**Cambridge Public Schools District Goals for 2008 - 2009**

The School Committee and the administration have jointly developed goals for the Cambridge Public Schools

that are accompanied by measures of progress. The goals are intended to provide improvement targets and guidance for teaching/learning and school district operations. The goals are focused on the challenges of providing a creative and rewarding high-quality education, accelerating and increasing achievement for all students, and surpassing state and federal requirements.

The goals will be carried out through a creative approach based upon:

- Excellent teaching
- High standards of performance for all staff and all students
- A diverse workforce fully engaged with students
- Supportive, effective and demanding professional development for all staff.
- A culture of learning that requires of students full engagement, authentic assessment, citizenship development, active appreciation of the arts, and full participation in school, the community and city

Families and community partnerships are vital to successful education. We recognize the necessity of committed staff and involved community to help students develop as thinkers, doers, appreciators, and contributing citizens of the school, community and society.

On the Family Information Station in the main lobby for your review is a word document form of the complete goals statement for the Cambridge Public Schools for the 2008-2009 school year.
