

How can I view my child's course requests?

Click the Family Top Tab and then click on your child's name

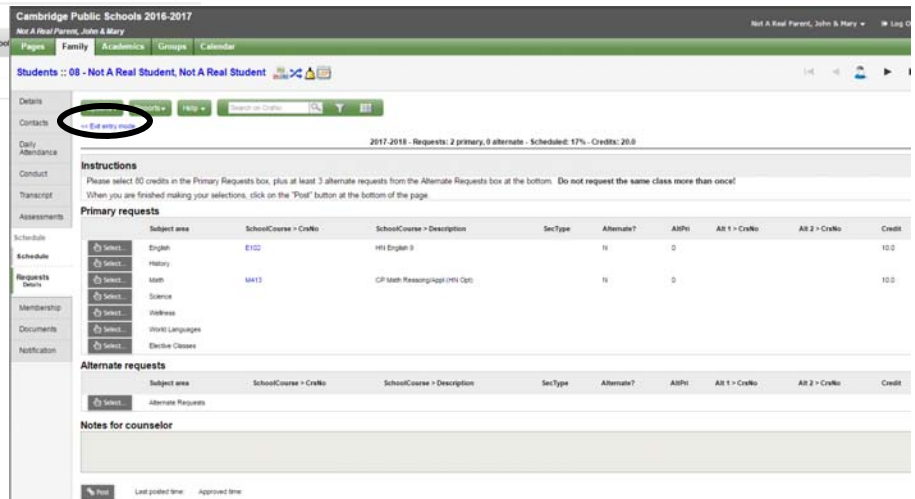

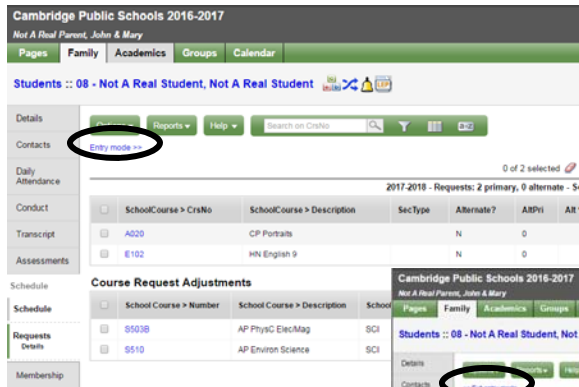

Click on the Schedule side tab and then you'll see the Requests side tab (click on it)

You can view the requests in this view or entry mode to help your child enter requests.

If entry mode is not available, it means that the course selection period is over and you should contact your child's guidance counselor if you need to make a change or enter requests.
