

A tropical beach scene with palm trees and a clear blue sky. The beach is sandy and curves along the water's edge. In the background, a line of palm trees stands against the sky. The water is calm and blue.

Attention: FRESHMAN & SOPHOMORES

Come to a meeting and find out how you can spend a Semester studying in the Bahamas at The Island School. The meeting will be on

Thursday, January 15th at 1:10pm Period 4
in the CCRC Room 1501

Please sign-up on Naviance or in the CCRC
or See Mr. McGuinness in 3402 for more information

The Island School is a mind, body, and spirit journey that takes students away from traditional high school curriculum and invites them to confront authentic challenges. Experiential, place based learning connected to the environment of The Bahamas. English, math, environmental art, history, and marine ecology are offered, and each course focuses on the application of knowledge to real-world problems. SCUBA diving, island exploration, and two short kayaking expeditions complement daily morning exercise, science research projects, and campus work that encourages each student to develop leadership and teamwork skills.

Dive in and experience The Island School!
