

Get your child ahead on the road to college

A Science, Technology, Engineering and Math (STEM) program for Grades 4 through 7

Math and science come alive for kids during this Saturday-only mentoring program.

TTT Mentor Program is open for registration for children in grades 4-7. The program is seeking children with strong interests in STEM initiatives and, children of a range of diversity of abilities. This is an opportunity to have mentors tutor your child to improve their math skills, and to learn new skills creating a competitive science or computer project, and participating in MIT science labs.

Mentors are MIT and local university science students and STEM professionals. The class instructors and mentors are also experienced industry experts and teachers in Computer Science and other STEM areas.

This program runs from September thru January. Limited Seats

Fun activities are scheduled throughout the academic school year.
