

At the heart of learning

# I BUILD

## Grades 6-8

**Wednesdays 5:30 – 7:00pm**

**Cambridge Street Upper School**  
158 Spring St, Cambridge, MA 02141

**Oct. 19 - Dec. 14**

I Build is an enrichment program designed to engage students who want to learn about the Engineering Design Process. Students will be presented with several projects challenging them to work in teams to make both creative and functional designs. This year's project will involve water filtration and its real life applications.

Previous projects have included: engineering a response to a pandemic, engineering solutions to urban design and runoff, electrical engineering, structural engineering, and more! The program also features a field trip to see the Engineering Design Process in action!

---

**Please fill out this form and return to the Tutoring Plus office in the lower level of the Fletcher-Maynard Academy. We may require additional medical and photo release forms for your child to participate.**
