

Get your child ahead on the road to college

A Science, Technology, Engineering and Math (STEM) program for Grades 4 through 7

Math and science come alive for kids here

at this popular Saturday only program for grades 4 – 7 children of STEM interests and eager to learn. This program is an opportunity for students to improve math their skills, to create a competitive science project, and to participate in MIT science labs. It is a program of **academics** and **enrichment** activities.

Volunteering mentors are MIT and other local university STEM majoring students and STEM professionals. Some mentors are experienced industry experts and teachers in Computer Programming, Science and other technology areas.

The program runs Saturdays from September through January.

Prerequisite math skills and a strong interest in STEM are required for admission.
