SUPPLEMENTAL INFORMATION: Follett Contract

Number	Description	Cost
1	ASPEN Annual Licensing & Maintenance	\$57,352
1	Destiny Library Automation Implementation	\$13,588
	GRAND TOTAL	\$70,940

ASPEN Licensing

ASPEN (X2) is the core student information system employed by the school department to manage all student data including but not limited to; enrollment, schedules, demographics, grades, assessments, reporting, program enrollment, discipline, learning management and student and parent portal services etc... ASPEN (X2) has been used for this purpose since the summer of 2013. The fees being charged are the annual licensing and maintenance fee for the current system.

Destiny Library Automation

After extensive research, Destiny, a module of Follett's Aspen X2 System, was chosen as the best solution to meet district's library automation needs.

Follett Destiny is a comprehensive library management system designed to manage not only inventory and circulation management, but also student engagement. It is the only product that has been integrated at the source with Follett's Aspen X2 student information system and IMS, allowing the library media center to function as an extension of the curriculum. Follett's single sign on model, and internal data synchronization provides a seamless software entity where teachers and students assign and access resources through a common portal. In addition, referrals and assignments in one portion of the system have direct impact on the others, including Destiny. This extends to catalog searches, ebook borrowing, digital research/database resources, and resource acquisition. No other library management product on the market comes close to this depth of integration.
