RE: Annual Review of the Controlled Choice Plan

---

For the current school year, the district's elementary schools had an enrollment of 3,992 students as of October 1, with an SES ratio of 45% free/reduced lunch students and 55% paid lunch students. This is a 4% increase of paid lunch students and a 4% decrease of free/reduced lunch students from the previous year. With the exception of a small number of students eligible for free/reduced lunch that file late applications during the school year, a review of the lunch applications filed for this school year indicates that the SES ratio is an accurate representation of the district.

The enrollment has decreased by 97 students from the previous year resulting in a 2% decrease which was the smallest decrease in recent history. Over the last five school years, the enrollment at the elementary schools has fallen by approximately 900 students, however the percentage has steadily declined each year with an 8% decline in students from 2002 to 2003, 7% from 2003 to 2004, 4% from 2004 to 2005, and 2% from 2005 to 2006.

The Amigos (4%), Fletcher/Maynard (4%) and the Peabody (7%) schools had an increase in enrollment from SY 2005-06 to SY 2006-07. With the exception of the Peabody School, there was also an increase in the number of paid lunch students. The enrollment at the Baldwin School remained the same from SY 2005-06 to SY 2006-07 and had an increase of paid lunch students as well.

The Cambridgeport, Graham & Parks, Haggerty, Kennedy/Longfellow, King Open, King, Morse and Tobin schools had a decrease in enrollment from SY 2005-06 to SY 2006-07 ranging from 15% at the Kennedy/Longfellow to 1% at the King Open. The Cambridgeport, Kennedy/Longfellow, Morse and Tobin schools had a decrease in the number of paid lunch students, whereas the Graham & Parks, Haggerty, King Open, and King schools had an increase in the number of paid students enrolled.

The four schools that are within the +/- 10% of the school year 2006-07 assignment SES ratio of 48% free/reduced and 52% paid are the King, King Open, Morse and the Peabody. **Exhibit A and B** report the SES balance based on enrollment which includes students that are not subjected to the Controlled Choice Plan, such as self-contained special education students, students enrolled in the Sheltered English Immersion program, and Special Start students.

**Exhibit C** shows the SES balance based on capacity at each school which is the method used to assign students at the elementary schools with the exception of the Amigos School. It should be noted that the SES calculations in **Exhibit C** only include students that are subjected to the Controlled Choice Plan. Ten of the eleven elementary schools are within the +/- 10% of the

district's SES ratio. The one school that is not within the ratio based on capacity is the Graham & Parks. The Graham & Parks paid lunch enrollment exceeds its seat capacity by 22 students. A detailed summary of enrollment can be found in **Exhibit C2**. The explanations for the overenrolled paid lunch students include expired lunch applications from the previous school year, changes in socio-economic status from the previous school year, and paid students enrolled in grades one through four that now exceed the reduced capacity change.

There is a high demand from applicants at four of the seven imbalanced schools, Baldwin, Cambridgeport, Graham & Parks and Haggerty, which results in a high percentage of occupied seats, 88%, 83%, 93% and 80%, respectively. However, the demand for the paid seats is much greater than the demand for the free/reduced seats and leads to an imbalance favoring paid lunch students. The demand for the paid lunch seats at these respective schools has almost reached its capacity, whereas the demand for the free/reduced lunch seats has reached a low of 42% of capacity at the Cambridgeport and a high of 51% of capacity at the Baldwin. Since the paid lunch seats are almost filled at these schools and there is a low demand from free/reduced lunch students for the vacant seats, the schools show an imbalance that favors paid lunch students. Please refer to **Exhibit D**.

At the remaining three imbalanced schools, Fletcher/Maynard, Kennedy/Longfellow, and Tobin, the percentage of occupied seats is lower, 65%, 74% and 72%, respectively, which results in a high number of vacant seats. The demand for seats at these schools is in favor free/reduced seats and the demand from paid lunch students has not even reached 50% of the capacity at any of the schools. Their lower percentage of paid lunch seats filled to capacity combined with their high number of seats available creates an imbalance in favor of free/reduced lunch. Please refer to **Exhibit D**.

### **Kindergarten:**

There were 397 applicants for the First Cycle Kindergarten Lottery. The socio-economic breakout of the applicants was 147 Free/Reduced (F/R) applicants and 250 Non Free/Reduced (Non F/R) applicants, 37% F/R and 63% Non F/R. In **Exhibit F**, there is a detailed analysis of the demographics of these applicants.

The results from the lottery indicated that 92% of families received one of their choices; 86% received their first choice, 4% received their second choice and 2% received their third choice. The overall number and percentage of families receiving a school of choice increased from the SY 2005/06 to SY 2006/07. In SY 2006/07, 78% of the Non F/R applicants and 98% F/R applicants received an assignment to their first choice school.

The remaining 8% of families (mandatory assignments) were assigned to one of the six schools with available seats (**Exhibit I**) and received priority placement on the waitlists for their chosen schools. In comparison to the lottery results from SY 2005/06, there were significantly less mandatory assignments. In **Exhibit G**, there is a comparison of the mandatory assignments from SY 2004/05, SY 2005/06 and SY 2006-07 as well as a further six year comparison of mandatory assignments.

The Family Resource Center called all the families that did not receive one of their choices to discuss their preference of the schools with available seats and also explained the waitlist process. All other families were sent an assignment letter via mail on March 20, 2006.

It should also be noted that the Family Resource Center and the Office of Public Information continued to work together on an outreach plan that included distributing posters throughout the city, mailings to low income housing developments and Section 8 residents, and also used ConnectEd to remind sibling parents about kindergarten registration.

**Ethnic Codes:**  
 1=White/Caucasian  
 2=Black/African American  
 3=Asian  
 4=Native American  
 5=Native Hawaiian/Pacific Islander  
 6=Multi-Race, Non-Hispanic  
 7=Hispanic

**Note:** The change in ethnic codes from the prior school year are due to a change made by the federal government. All school districts in Massachusetts are required to report student data by race and ethnic categories to the Massachusetts Department of Education (DOE). The Cambridge Public Schools complied with all reporting regulations set forth by the DOE and began reporting student data to the DOE using the new federal categories for the 2005-06 school year.

**\*SES Balance For Assignment Purposes:**

The # of F/R and Non F/R seats in each grade is determined based on the capacity of each grade at each school. The SES balance does not include the Sheltered English Immersion students or students in Self-contained Special Education classrooms.

\*\*School is within 10% of the district wide average (48% F/R and 52% Non F/R) that is used for assigning students in SY 2006-07.

\*\*\*This count does not include SEI students or Self-contained Special Education students.

**Note:**

When a school's SES balance does not total 100%, it is due to vacant seats held open in the out of balance SES category.

**SES Imbalance  
Graham & Parks School**

**Change in Capacity:**

|   |            |
|---|------------|
| Capacity 2005-06  | 390        |
| Add:<br>Grade 5/6 Classroom   | 22         |
| Less:<br>Reduced Capacity in Grades 1-4<br>(22:1 in SY 2005-06, 20:1 in SY 2006-07) | (16)       |
| Capacity 2006-07  | <b>396</b> |
