

TOXIC STORAGE

In the course of carrying out its academic mission, it is recognized that certain hazardous materials are used and stored in the Cambridge Public School buildings. These materials include, but are not limited to, materials used in academic programs such as science labs, art programs, technology programs and automotive programs, as well as in building maintenance functions. In order to ensure student and staff safety, the district shall follow all applicable local, state and federal regulations in the use, storage and disposal of all hazardous (flammable and/or combustible, corrosive, reactive and toxic) materials. Furthermore, the district shall adhere to rules and regulations promulgated by the Superintendent and/or designee to implement this policy.

Adopted: June 15, 2004
