## TABLE OF CONTENTS

Introduction ..... i-iii
Highlights of District Benchmarks ..... iv-xiv
District Benchmarks K-5 ..... 17-33
District Benchmarks 6-8 ..... 34-48
District Benchmarks 9-12 ..... 49-70
Glossary ..... 71

# INTRODUCTION 

## What are the CPS Benchmarks of Student Achievement?

The Cambridge Public Schools (CPS) Benchmarks were developed by principals and central office administrators from standards derived through state testing programs, TIMSS (Trends in International Mathematics and Science Study), standards in other states, and accepted research from experts in the field of education. The benchmark documents are a result of a review of this body of knowledge tempered by the experience of CPS administrators, teachers, and school councils. They serve as an accountability tool for schools and the district. In addition, the benchmarks help the community understand overall student achievement and progress in closing the achievement gap in our city's schools.

The CPS Benchmarks are comprehensive including primary and secondary indicators of achievement. Primary indicators are those set by the federal government's No Child Left Behind (NCLB) Act. Primary indicators include a standard of proficiency in English Language Arts (ELA) and Mathematics as measured by MCAS, the Massachusetts state testing program. Secondary indicators include additional academic assessments as well as measures of school climate, family participation / satisfaction, assessments of English Language Learners, Cambridge Rindge and Latin (CRLS) graduation indicators, and competencies for Rindge School of Technical Arts (RSTA).

Benchmarks are determined for individual schools and the district and are organized by grade levels K-5, 6-8 and 9-12. They are also determined for subgroups of students in order to measure the extent to which the school/ district has addressed the achievement gap. Students are categorized into subgroups as defined by the NCLB legislation.

Reports included in this document represent three years of benchmark data. Benchmark reports are used in assessing student outcomes in each school and overall progress of the school district. Individual school benchmarks are used by the school in annual school improvement planning and by the superintendent as one piece of the evaluation of principals. The district uses benchmarks to measure: progress in overall student achievement, the extent to which progress is made in closing the achievement gap among subgroups of students, the efficacy of existing programs, and the need for revisions in the District Improvement Plan.

## How Do I Read the Benchmark Document?

The broad categories are listed along the left hand side of the document. They include: testing, school climate, course enrollment, grades and graduation requirements. Specific indicators are listed within each category. MCAS proficiency in English Language Arts and Mathematics are considered primary indicators as measured by the No Child Left Behind (NCLB) federal requirements. All other indicators including MCAS passing rates are considered secondary indicators.

## Indicators include:

## Academic Achievement Data

- MCAS (3-10) including alternate MCAS assessments for special education students
- Early Literacy Assessment in reading and writing (K-2)
- Literacy Collaborative Reading Assessment (3-5)
- Report card grades (6-12)
- Course failure rates (6-12)
- SAT
- PSAT
- AP (Advanced Placement course enrollment and exam pass rates)

## School Climate Information

- Discipline report
- Attendance
- Effective School Battery results ( teachers K-12, students 6-12)
- Parent participation in Student Conferences (K-8)
- Student participation in school sponsored extra curricula activities (9-12)
- Staff participation as advisors, sponsors, coaches in extra curricula activities (9-12)

## Assessments for English Language Learners

- MELA-O (English Proficiency testing for English Language Learners) K-2
- MEPA R/W ( Massachusetts English Proficiency Assessment in Reading and Writing for ELL students)

## RSTA Indicators

- RSTA field placement
- Career certification (RSTA)

## Graduation Indicators CRLS

- MCAS Competency Determination
- Graduation rate
- Dropout rate

## Establishing Benchmarks

Data from 2004-2005, 2005-2006 and 2006-2007 are listed next to each indicator and are used to determine growth from one year to the next. The next five (5) columns represent a continuum of progress in each area from Benchmark 1 being lowest to a Standard of Excellence. Data from 2006-07 is used to determine which benchmark is highlighted in yellow. When progress is not sufficient to reach Benchmark 1, the indicator box is highlighted.

Often a school will show improvement in values but will not move up a benchmark in a year. The goal is to see improvement from one year to the next.

## How will this document address the achievement gap in our schools?

Overall progress in each indicator is first reported for the aggregate (all students) within a school or in the district. Progress on each indicator is then reported for each subgroup of students. In determining the achievement gap for any indicator, the progress of students in a racial/ethnic subgroup is measured against the standard of proficiency.

Progress was reported for the MCAS \& CPS Literacy Assessments when there were 10 or more students in the subgroup. For all other indicators, the subgroups needed to have 20 or more students to have their results reported. The subgroups are those defined by NCLB legislation and are the same as those reported on schools’ Adequate Yearly Progress (AYP) reports. They include:

- African American/ Black
- Asian
- Hispanic
- White
- Multi-Race, Non-Hispanic
- Students receiving Free/ Reduced Lunch
- Special Education
- LEP (Limited English Proficient)

## How is this information connected to district and school improvement planning?

Benchmark data is used by the district and schools as a part of on-going improvement planning. Each school is responsible for summarizing overall achievement, showing progress in closing the achievement gap, and identifying specific areas of concern and focus. This information becomes part of the district/school's improvement plan. Each year the data is updated, progress is reviewed and School Improvement Plans are updated as part of a continuous improvement cycle.

The following pages include a summary of highlights from the district Benchmark Reports. As in the case of the schools, the district will incorporate this information into its revised District Improvement Plan for the upcoming school year.

# CPS ELEMENTARY BENCHMARKS OF STUDENT ACHIEVEMENT <br> Grades Kindergarten - 5 

Highlights 2006-2007

## Academic Indicators

## MCAS

MCAS data is reported by the Composite Performance Index (CPI). This index is used to determine how close a school/ district is to getting all students to proficiency, a CPI index of 100.

## English Language Arts (ELA) - Grades 3, 4, 5

- The CPI for Grade 3 Reading decreased by 1.2 points from the prior year while the state increased by 0.1 points. Third grade reading results are at Benchmark 4 (81.6). The state is also at Benchmark 4 (83.5).
- The CPI for Grade 4 English Language Arts increased by 5.2 points while the state increased by 2.4 points. Grade 4 English Language Arts results are at Benchmark 3 with a CPI of (78.1). The state is at Benchmark 4 (81.2). It should be noted that the grade 4 ELA differs from the grade 3 \& 5 tests in that it includes writing as well as reading.
- The CPI for Grade 5 English Language Arts increased by 1.4 points from the prior year while the state increased by 0.9 points. Fifth grade reading results are at Benchmark 4 (81.8). The state is also at Benchmark 4 (84.6).

## Student Subgroups

- There was an increase in the CPI for Grade 3 Reading for Special Education students. African American, Asian, White, Hispanic, and Special Education subgroups outperformed the state.
- There was an increase in the CPI for Grade 4 English Language Arts for African American, Asian, White, Low Income and Special Education subgroups. All racial subgroups and the Low Income subgroup outperformed the corresponding state subgroups.
- There was an increase in the CPI for Grade 5 English Language Arts for African American, Asian, Hispanic and Special Education students. Asian, Hispanic, White and Low Income students outperformed their state counterparts.

## Areas of Focus

- Continued focus on improving Grade 3 Reading with a concentration on improving the performance of LEP students and a small number (2) of schools in particular.
- The performance of Special Education and LEP students in Grade 4 ELA was lower than the state. These students, along with African American students and Low Income students continue to be a focus across the entire district and at each school.
- The performance of Special Education students in Grade 5 ELA was lower than the state.

## Mathematics - Grades 3, 4, 5

- The CPI for Grade 3 Math decreased by 1.6 points from the prior year while the state increased by 2.3 points. CPS results are at Benchmark 3 (73.9). The state is at Benchmark 4 (80.3).
- The CPI for Grade 4 Math increased by 1.0 points from the prior year while the state increased by 3.7 points. Both the state and CPS are at Benchmark 3.
- The CPI for Grade 5 Math increased by 5.6 points from the prior year while the state increased by 5.4 points. Both the state and CPS are at Benchmark 3.

## Student Subgroups

- There was an increase in the CPI for Grade 3 Math for White students only with this subgroup outperforming the state.
- There was an increase in the CPI for Grade 4 Math for Asian and White subgroups. All racial subgroups and Special Education students outperformed the state subgroups.
- There was an increase in the CPI for Grade 5 Math for African American, Hispanic, White and Special Education subgroups. White and Low income students outperformed the state.

## Area of Focus

- Continued focus on Grade 3, 4, 5 Mathematics with a particular focus on subgroup performance
- Mathematics continues to be a priority in the district with a particular focus on those schools that did not make AYP (adequately yearly progress) in Math.

## CPS Literacy Assessments

## Early Literacy Assessment Reading and Writing K-2

- $78 \%$ of the students in grades K-2 achieved proficiency in reading, a decrease of $3 \%$ from the prior year.
- $68 \%$ of the students in grades K-2 achieved proficiency in writing, an increase of $3 \%$.

## Student Subgroups

- On K-2 ELA Reading Assessment, Asian students achieved the Standard of Excellence.
- On K-2 ELA Writing Assessment, the percentage of African American, Asian, Low Income, Special Education and LEP students increased in proficiency.

## Areas of Focus

- In the K-2 ELA Reading Assessment, the performance of Special Education students remained in Benchmark 1 with less than $50 \%$ of students reading at the benchmark.
- In the K-2 ELA Writing Assessment, Special Education students are below Benchmark 1 with less than $40 \%$ writing at the ELA grade level benchmark.
- Full implementation of the Literacy Collaborative continues to be a priority at the district with a particular focus on the one school that did not make AYP (adequate yearly progress) in ELA.

## Reading Grade 3

- Two indicators are used to measure reading progress at grade 3: the percentage of students passing the Grade 3 MCAS and the percentage of students achieving proficiency based on the Literacy Collaborative Reading Assessment. The Literacy Collaborative Reading Assessment is a diagnostic tool for reading instruction and is also used to determine independent reading levels based upon a standard higher than MCAS results.
- $89 \%$ of all grade 3 students passed the 2007 MCAS exam. This was a $4 \%$ decrease from the previous year.
- $62 \%$ of all grade 3 students achieved proficiency using the more rigorous Literacy Collaborative Assessment. This was a 2\% decrease from the previous year, the first time the assessment was administered.

## Student Subgroups

- Grade 3 Reading (MCAS)- Asian and White students achieved Benchmark 4 with over $90 \%$ of students from these subgroups passing the Grade 3 MCAS.
- CPS African American (84\%), Hispanic (81\%), SPED (75\%) and LEP (79\%) students passed at a higher rate than the state African American (82\%), Hispanic (78\%), SPED (71\%), and LEP (70\%).

## Areas of Focus

- For Grade 3 Reading, 75\% of Special Education and 79\% of Limited English Proficient students passed the Grade 3 MCAS, placing their performance at Benchmark 1.
- On the Grade 3 Literacy Collaborative Reading Assessment, less than 50\% of African American, Hispanic and F/R Lunch Students achieved proficiency in reading.
- Only 31\% of Special Education students achieved proficiency in reading on this assessment.

## Literacy Collaborative Assessment Grades 3-5

- This assessment was given for the first time in 2005-2006 and is designed to measure reading proficiency not passing. It is a rigorous standard. This year, $62 \%$ of students reached literacy collaborative proficiency in reading in grades 3 through 5 . This was a decrease of $5 \%$ from the previous year.

## Student Subgroups

- On the Grades 3-5 Literacy Collaborative Reading Assessment, the performance of all subgroups declined.

## Areas of Focus

- On the Grades 3-5 Literacy Collaborative Reading Assessments, only 29\% of Special Education, students and $14 \%$ of LEP students reached the benchmark, ranking these subgroups at Below Benchmark 1. 47\% of African American students and 45\% of Low Income students achieved proficiency on the Literacy Collaborative Reading Assessment, ranking these subgroups at Benchmark 1. There is a focused effort at the district and school level to accelerate progress of these identified subgroups of students in collaboration with university partners.

## School Climate Indicators

## Discipline

- The percent of suspensions decreased from previous years. $1.4 \%$ of K-5 students were suspended last year in comparison with $1.9 \%$ in the two previous years.

## Area of Focus

- While all subgroups met the standard of excellence for discipline, Special Education, African American and F/R Lunch students got suspended more often than other subgroups.

## Attendance

- The attendance rate increased to $96 \%$ from the previous year"s $95 \%$.

## Student Subgroups

- All subgroups maintained at least $95 \%$ attendance.

## Parent/ Guardian Participation in Student Conferences

- This was the second year that data was collected on the percent of parents attending student conferences. $90 \%$ of parent/guardians attended conferences in the fall and spring, an increase of $13 \%$ from the previous year.

# CPS MIDDLE SCHOOL BENCHMARKS OF STUDENT ACHIEVEMENT <br> Grades 6-8 

Highlights 2006-2007

## Academic Indicators

## MCAS

## English Language Arts (ELA) - Grades 6, 7, 8

- The CPI for Grade 6 ELA (84.5) increased by 3.5 points from the prior year while the state increased by only 1.5 points.
- The CPI for Grade 7 ELA (88.0) increased by 8.2 points from the prior year while the state increased by only 2.3 points.
- The CPI for Grade 8 ELA (85.8) increased by 0.1 points from the prior year while the state increased by 1.2 points.

## Student Subgroups

- On the Grade 6 ELA exam, all subgroups outperformed the state except Limited English Proficient students.
- On the Grade 7 ELA exam, all subgroups outperformed the state.
- On the Grade 8 ELA exam, all subgroups outperformed the state except African American students.

## Areas of Focus

- While in most cases, Special Needs and Limited English Proficient students outperformed the state, these students' performance on the MCAS exams ranked them at Benchmark 1 and/or 2.

## Mathematics - Grades 6, 7, 8

- The CPI for Grade 6 Math increased by 4.4 points from the prior year while the state increased by 4.4 points. The performance of both CPS and the state grade 6 students is at Benchmark 3 with a CPI of 70.9 and 75.5 respectively.
- The CPI for Grade 7 Math increased by 8.9 points from the prior year while the state increased by only 3.8 points. The performance of grade 7 is at Benchmark 2 with a CPI of 67.5 ; the state is at Benchmark 3 with a CPI of 70.4.
- The CPI for Grade 8 Math decreased by 0.4 points from the prior year while the state increased by 3.9 points. The performance of grade 8 is at Benchmark 2 with a CPI of 62.2; the state is at Benchmark 3 with a CPI of 70.2.

## Student Subgroups

- There was an increase in the CPI for Grade 6 Math for all subgroups except Asian and LEP students. With the exception of Asian and LEP students, all CPS student subgroups outperformed the state subgroups.
- There was an increase in the CPI for Grade 7 Math for all subgroups. All CPS student subgroups outperformed the state subgroups.
- There was an increase in the CPI for Grade 8 Math for Asian, Hispanic and Low Income students.
- All CPS student subgroups outperformed the state subgroups, with the exception of White and African American students.

## Areas of Focus

- While the performance of Special Education and LEP students in Grade 6, $7 \& 8$ increased and in most cases was higher than the state subgroups, the performance of these subgroups of students is still below Benchmark 1 in Math.

## Course Grades $7^{\text {th }} \& 8^{\text {th }}$

- $35 \%$ of $7^{\text {th }}$ and $8^{\text {th }}$ grade students received an A or a B in the 4 core subject areas. This percent is down $4 \%$ from the prior year but still at the Standard of Excellence.
- $10 \%$ of $7^{\text {th }}$ and $8^{\text {th }}$ grade students received a C or below in the 4 core subject areas. This percent decreased by $4 \%$ from the previous year.
- $2 \%$ of $7^{\text {th }}$ and $8^{\text {th }}$ grade students failed 2 or more courses. This is an increase of $1 \%$ from the prior year.

## Student Subgroups

- More than 20\% of all Asian, Hispanic, White and Low Income students received all A’s and B’s in the 4 core areas.
- Fewer students in all subgroups received a C or below in the 4 core subject areas.

## Area of Focus

- A lower percentage of Limited English Proficient students (3\%) received A's and B's in all 4 core areas than other subgroups.
- The percentage of Hispanic students with two or more course failures increased by $4 \%$.

## School Climate Indicators

## Discipline

- There was an increase in the overall percentage of students being suspended from 9.7\% to $11.7 \%$

## Student Subgroups

- African American, Special Needs students, Hispanic and Low Income students continue to be suspended at a rate greater than other students. Both the African American/Black subgroup and Special Needs students are below Benchmark 1.

## Attendance

- The attendance rate showed a slight decline from $96 \%$ to $95 \%$.

Student Subgroups

- With the exception of Special Education and Multi-racial students, all subgroups maintained at least 95\% attendance.

## Parent/ Guardian Participation in Student Conferences

- This was the second year that data was collected on the percent of parents attending student conferences. This year 74\% of parent/ guardians attended conferences in the fall and spring. This was an increase of $10 \%$ over the previous year.

## Areas of Focus

- Disciplinary program for identified subgroups of students and attendance rates for Special Needs students.

# CPS HIGH SCHOOL BENCHMARKS OF STUDENT ACHIEVEMENT 

Grades 9-12
Highlights 2006-2007

## Academic Indicators

## MCAS

MCAS data is reported by the Composite Performance Index (CPI). This index is used to determine how close a school/ district is to getting all students to proficiency, a CPI index of 100.

## English/Language Arts (ELA) \& Math

- The CPI for Grade 10 English Language Arts decreased by 0.7 points from the prior year while the state increased by 1.1 points. The grade 10 ELA results are at Benchmark 4 with a CPI of 86.8. The state is also at Benchmark 4 with a CPI of 87.9.
- The CPI for Grade 10 Math increased by 3.5 points while the state increased by 1.8 points. Both CPS and the state Grade 10 Math results are at Benchmark 4. CPS has a CPI of 86.2 and the state CPI is 85.0.

## Student Subgroups

- There were slight decreases in the CPI for Grade 10 ELA for all subgroups. Most of the student subgroups outperformed the state's corresponding subgroups in English Language Arts. The exceptions were Asian, SPED, and LEP.
- There was an increase in the CPI for Grade 10 Math for all subgroups except LEP students. Each of the student subgroups, including LEP students, outperformed the state's corresponding subgroups.

## Areas of Focus

- In Grade 10 ELA, the performance of Limited English Proficient students is at Benchmark 1 \& Special Education students are at Benchmark 2.

## SAT, PSAT \& AP EXAMS

## SAT

- $77 \%$ percent of the graduating senior class took an SAT exam. This was a $1 \%$ increase from the previous year, and this level of participation met the Standard of Excellence Benchmark.
- The average combined Verbal \& Math SAT Score was 951, a decrease from the previous year’s average of 992.

## PSAT

- $55 \%$ percent of the sophomore class took the PSAT exam. This was a $1 \%$ increase from the previous year. This level of participation is at Benchmark 2.
- The mean school index was 135 points, an increase of 7 points from the previous year.

## AP Courses \& Exams

- $34 \%$ of the $11^{\text {th }}$ and $12^{\text {th }}$ grade students were enrolled in AP courses last year. This was a decrease of $1 \%$ from the previous year.
- $71 \%$ of the students taking AP exams passed at least one of those exams. This was a $2 \%$ decrease from last year.

## Student Subgroups

- The average combined Verbal \& Math SAT score for White students was 1104, which met the Standard of Excellence.
- More African American (21\%) and Hispanic students (29\%) were enrolled in AP courses last year than in previous years. For African American students, this was an increase of $3 \%$ and $6 \%$ for Hispanic students. This is significant since the overall rate of enrollment in AP courses went down last year.
- The percentage of African American students passing AP exams (61\%) increased dramatically from previous years. Two years ago only $38 \%$ of African American students taking AP exams passed.

## Areas of Focus

- Special Education and Hispanic students had combined Math \& Verbal SAT scores that placed them below Benchmark 1 while African American and Low Income students were at Benchmark 1.
- African-American, Hispanic, Free/Reduced Fee Lunch, SPED and LEP students had below benchmark participation on the PSAT, meaning that less than $50 \%$ of these subgroups took PSAT exams.
- The percentage of SPED and LEP students taking AP courses was below Benchmark 1 meaning that less than $20 \%$ of these subgroups were enrolled in an AP course.

## GRADUATION \& GRADES

## MCAS CD (competency determination) STATUS

- $99 \%$ of the senior class passed both the $10^{\text {th }}$ grade ELA and Math MCAS exams by the end of the senior year. This was a $1 \%$ increase from the previous year, and a $14 \%$ increase from three years ago.

## Graduation Rate

- $97 \%$ of the senior class received a diploma at the June Graduation ceremony. This was a $2 \%$ increase from the previous year, and a $17 \%$ increase from three years ago.

## Course Enrollment for Graduating Seniors

- $45 \%$ of the graduating seniors completed 4 years of Math, a decrease of 5\% from the previous year and a ranking of Benchmark 3.
- $41 \%$ of the graduating seniors completed 3 years of a foreign language, an $11 \%$ decrease from the previous year and a ranking of Benchmark 3.
- $88 \%$ of the RSTA graduates majored in a technical program meeting the Standard of Excellence.

## Dropout Rate

- The dropout rate for the 2005/2006 academic year at CRLS was $2.7 \%$. This was an increase from the previous year of $1.4 \%$. This was the first year that the DOE included summer dropouts in its dropout calculation. The DOE publishes the preceding year's dropout rate in March of the following school year. The 2006/2007 dropout rate will be published in March 2008.

## Student Subgroups

- All student subgroups are at Benchmark 4 or above having passed both MCAS exams before the end of their senior year. The one exception is LEP students (88\%).

## Areas of Focus

- LEP students continue to graduate at lower rates than the other subgroups. Ranked at Benchmark 1, less than $85 \%$ of these students graduated in June.
- Hispanic and Low Income graduates were less likely to have completed 4 years of Math than other subgroups. They ranked at Benchmark 2 on this indicator.
- African American, Hispanic and Low Income graduates were less likely to have completed 3 years of a foreign language than other subgroups. They ranked at Benchmark 2 on this indicator.
- SPED students were below Benchmark 1 on both of the above indicators.

## GRADES

- The percentage of students with a GPA greater than A- remained the same at $15 \%$.
- The percentage of students with a GPA lower than C- decreased to $17 \%$ from $19 \%$ in the previous year. Over the past two years, there has been a $4 \%$ decrease in this indicator.
- The percentage of students failing two or more courses also decreased by $2 \%$ to $7 \%$ last year. Over the past two years, there has been a $4 \%$ decrease in this indicator.

## Student Subgroups

- More than $25 \%$ of White and Asian students have a GPA greater than A- meeting the Standard of Excellence Benchmark.
- Fewer African American, Low Income, and Special Education students failed two or more courses than in previous years.

## Areas of Focus

- African American, Hispanic, Special Education and F/R Lunch students were much less likely to have a GPA greater than A-
- While the percentage of African American, Hispanic and Low Income students having a GPA of Cor below remained the same, more Special Education students had a GPA of C- or below (43\%) than in previous years.
- More than $10 \%$ of all Hispanic, Multi-racial, and Special Needs students failed two or more courses ranking them at Benchmark 3 on this indicator.

## School Climate Indicators

## Attendance

- The attendance rate decreased by $1 \%$ to $93 \%$. This is a $2 \%$ increase over two years ago.

## Discipline

- There was a decline in the overall percentage of students having more than one infraction from $38 \%$ to $32 \%$. This is a $15 \%$ decline in the past two years.

## Student \& Staff Participation in School Sponsored Extra Curricular Activities

- There was an increase in the percentage of students participating in activities from $45 \%$ to $46 \%$ last year.
- There was an increase in the percentage of staff serving as school sponsored extra/co-curricular activity advisors, sponsors and coaches from 31\% in 2005-06 to 35\% of the staff.

## Student Subgroups

- LEP (94\%) and Asian (94\%) students had higher attendance rates than other subgroups.
- All subgroups had fewer students with one or more infractions.

## Areas of Focus

- Multi-racial (92\%), Hispanic (92\%) and Low Income (92\%) students were more likely to have lower rates of attendance than students in other subgroups.
- Special Education students were more likely to commit infractions than other students; $55 \%$ of all Special Education students committed one or more infractions.

*Multi-Race, Non-Hispanic is the term officially designated by the state as of the 2005-06 school year to refer to non Hispanic students who are multi-racial.

## Benchmarks Glossary

## Benchmarks Glossary November 2007

| AP | Advanced Placement courses are offered at the high school. There are also AP tests to determine student proficiency in those courses. Participation in AP courses is highly desirable for entrance into college. |
| :---: | :---: |
| Benchmarks | Fixed points along a continuum of growth towards proficiency in a particular area. |
| COP | Certificate of Occupational Proficiency - Awarded to RSTA seniors only |
| DETAIL | A detailed discipline report of CRLS student infractions presented to the School Committee monthly. |
| Effective School Battery | A survey measuring school climate administered to teachers K-12 and students 6-12. |
| ELL | English Language Learner |
| GAP Indicators | The performance among NCLB subgroups as compared to the standard. |
| GPA | Grade Point Average. A point system that reflects the average of students' grades. |
| LEP | Limited English Proficient |
| MCAS C.D. | MCAS Competency Determination - status achieved by CRLS students once they have passed both the MCAS English and MCAS Math tests. It is necessary for graduation. |
| MCAS - ELA | Massachusetts Comprehensive Assessment System English Language Arts |
| MELA-O | Massachusetts English Language Assessment-Oral; required by the state of ELL students K-12 |
|  | Massachusetts English Proficiency Assessment - Reading and Writing. Measures ELL students' English Language Proficiency against Massachusetts |
| MEPA - R/W | State Standards. |
| PSAT | Pre-Scholastic Achievement Test - serves as an opportunity for students to have an experience like the SAT. Determines eligibility for National Merit Award. |
| Primary Indicators | The first, most critical measure of school progress, i.e. proficiency of all students on the MCAS |
| SAT | Scholastic Achievement Test - required of most colleges as a condition of acceptance. |
| Secondary Indicators | Other measures of school progress that may contribute to, or indicate progress towards, proficiency on the MCAS. |

## INTRODUCTION

## What are the CPS Benchmarks of Student Achievement?

The Cambridge Public Schools (CPS) Benchmarks were developed by principals and central office administrators from standards derived through state testing programs, TIMSS (Trends in International Mathematics and Science Study), standards in other states, and accepted research from experts in the field of education. The benchmark documents are a result of a review of this body of knowledge tempered by the experience of CPS administrators, teachers, and school councils. They serve as an accountability tool for schools and the district. In addition, the benchmarks help the community understand overall student achievement and progress in closing the achievement gap in our city's schools.

The CPS Benchmarks are comprehensive including primary and secondary indicators of achievement. Primary indicators are those set by the federal government's No Child Left Behind (NCLB) Act. Primary indicators include a standard of proficiency in English Language Arts (ELA) and Mathematics as measured by MCAS, the Massachusetts state testing program. Secondary indicators include additional academic assessments as well as measures of school climate, family participation / satisfaction, assessments of English Language Learners, Cambridge Rindge and Latin (CRLS) graduation indicators, and competencies for Rindge School of Technical Arts (RSTA).

Benchmarks are determined for individual schools and the district and are organized by grade levels K-5, 6-8 and 9-12. They are also determined for subgroups of students in order to measure the extent to which the school/ district has addressed the achievement gap. Students are categorized into subgroups as defined by the NCLB legislation.

Reports included in this document represent three years of benchmark data. Benchmark reports are used in assessing student outcomes in each school and overall progress of the school district. Individual school benchmarks are used by the school in annual school improvement planning and by the superintendent as one piece of the evaluation of principals. The district uses benchmarks to measure: progress in overall student achievement, the extent to which progress is made in closing the achievement gap among subgroups of students, the efficacy of existing programs, and the need for revisions in the District Improvement Plan.

## How Do I Read the Benchmark Document?

The broad categories are listed along the left hand side of the document. They include: testing, school climate, course enrollment, grades and graduation requirements. Specific indicators are listed within each category. MCAS proficiency in English Language Arts and Mathematics are considered primary indicators as measured by the No Child Left Behind (NCLB) federal requirements. All other indicators including MCAS passing rates are considered secondary indicators.

## Indicators include:

## Academic Achievement Data

- MCAS (3-10) including alternate MCAS assessments for special education students
- Early Literacy Assessment in reading and writing (K-2)
- Literacy Collaborative Reading Assessment (3-5)
- Report card grades (6-12)
- Course failure rates (6-12)
- SAT
- PSAT
- AP (Advanced Placement course enrollment and exam pass rates)

## School Climate Information

- Discipline report
- Attendance
- Effective School Battery results ( teachers K-12, students 6-12)
- Parent participation in Student Conferences (K-8)
- Student participation in school sponsored extra curricula activities (9-12)
- Staff participation as advisors, sponsors, coaches in extra curricula activities (9-12)

## Assessments for English Language Learners

- MELA-O (English Proficiency testing for English Language Learners) K-2
- MEPA R/W ( Massachusetts English Proficiency Assessment in Reading and Writing for ELL students)

## RSTA Indicators

- RSTA field placement
- Career certification (RSTA)

## Graduation Indicators CRLS

- MCAS Competency Determination
- Graduation rate
- Dropout rate

## Establishing Benchmarks

Data from 2004-2005, 2005-2006 and 2006-2007 are listed next to each indicator and are used to determine growth from one year to the next. The next five (5) columns represent a continuum of progress in each area from Benchmark 1 being lowest to a Standard of Excellence. Data from 2006-07 is used to determine which benchmark is highlighted in yellow. When progress is not sufficient to reach Benchmark 1, the indicator box is highlighted.

Often a school will show improvement in values but will not move up a benchmark in a year. The goal is to see improvement from one year to the next.

## How will this document address the achievement gap in our schools?

Overall progress in each indicator is first reported for the aggregate (all students) within a school or in the district. Progress on each indicator is then reported for each subgroup of students. In determining the achievement gap for any indicator, the progress of students in a racial/ethnic subgroup is measured against the standard of proficiency.

Progress was reported for the MCAS \& CPS Literacy Assessments when there were 10 or more students in the subgroup. For all other indicators, the subgroups needed to have 20 or more students to have their results reported. The subgroups are those defined by NCLB legislation and are the same as those reported on schools' Adequate Yearly Progress (AYP) reports. They include:

- African American/ Black
- Asian
- Hispanic
- White
- Multi-Race, Non-Hispanic
- Students receiving Free/ Reduced Lunch
- Special Education
- LEP (Limited English Proficient)

## How is this information connected to district and school improvement planning?

Benchmark data is used by the district and schools as a part of on-going improvement planning. Each school is responsible for summarizing overall achievement, showing progress in closing the achievement gap, and identifying specific areas of concern and focus. This information becomes part of the district/school's improvement plan. Each year the data is updated, progress is reviewed and School Improvement Plans are updated as part of a continuous improvement cycle.

The following pages include a summary of highlights from the district Benchmark Reports. As in the case of the schools, the district will incorporate this information into its revised District Improvement Plan for the upcoming school year.

# CPS HIGH SCHOOL BENCHMARKS OF STUDENT ACHIEVEMENT 

Grades 9-12
Highlights 2006-2007

## Academic Indicators

## MCAS

MCAS data is reported by the Composite Performance Index (CPI). This index is used to determine how close a school/ district is to getting all students to proficiency, a CPI index of 100.

## English/Language Arts (ELA) \& Math

- The CPI for Grade 10 English Language Arts decreased by 0.7 points from the prior year while the state increased by 1.1 points. The grade 10 ELA results are at Benchmark 4 with a CPI of 86.8. The state is also at Benchmark 4 with a CPI of 87.9.
- The CPI for Grade 10 Math increased by 3.5 points while the state increased by 1.8 points. Both CPS and the state Grade 10 Math results are at Benchmark 4. CPS has a CPI of 86.2 and the state CPI is 85.0.

## Student Subgroups

- There were slight decreases in the CPI for Grade 10 ELA for all subgroups. Most of the student subgroups outperformed the state's corresponding subgroups in English Language Arts. The exceptions were Asian, SPED, and LEP.
- There was an increase in the CPI for Grade 10 Math for all subgroups except LEP students. Each of the student subgroups, including LEP students, outperformed the state's corresponding subgroups.

## Areas of Focus

- In Grade 10 ELA, the performance of Limited English Proficient students is at Benchmark 1 \& Special Education students are at Benchmark 2.

## SAT, PSAT \& AP EXAMS

## SAT

- $77 \%$ percent of the graduating senior class took an SAT exam. This was a $1 \%$ increase from the previous year, and this level of participation met the Standard of Excellence Benchmark.
- The average combined Verbal \& Math SAT Score was 951, a decrease from the previous year’s average of 992.

## PSAT

- $55 \%$ percent of the sophomore class took the PSAT exam. This was a $1 \%$ increase from the previous year. This level of participation is at Benchmark 2.
- The mean school index was 135 points, an increase of 7 points from the previous year.

## AP Courses \& Exams

- $34 \%$ of the $11^{\text {th }}$ and $12^{\text {th }}$ grade students were enrolled in AP courses last year. This was a decrease of $1 \%$ from the previous year.
- $71 \%$ of the students taking AP exams passed at least one of those exams. This was a $2 \%$ decrease from last year.

## Student Subgroups

- The average combined Verbal \& Math SAT score for White students was 1104, which met the Standard of Excellence.
- More African American (21\%) and Hispanic students (29\%) were enrolled in AP courses last year than in previous years. For African American students, this was an increase of 3\% and 6\% for Hispanic students. This is significant since the overall rate of enrollment in AP courses went down last year.
- The percentage of African American students passing AP exams (61\%) increased dramatically from previous years. Two years ago only $38 \%$ of African American students taking AP exams passed.

## Areas of Focus

- Special Education and Hispanic students had combined Math \& Verbal SAT scores that placed them below Benchmark 1 while African American and Low Income students were at Benchmark 1.
- African-American, Hispanic, Free/Reduced Fee Lunch, SPED and LEP students had below benchmark participation on the PSAT, meaning that less than $50 \%$ of these subgroups took PSAT exams.
- The percentage of SPED and LEP students taking AP courses was below Benchmark 1 meaning that less than $20 \%$ of these subgroups were enrolled in an AP course.

## GRADUATION \& GRADES

## MCAS CD (competency determination) STATUS

- $99 \%$ of the senior class passed both the $10^{\text {th }}$ grade ELA and Math MCAS exams by the end of the senior year. This was a $1 \%$ increase from the previous year, and a $14 \%$ increase from three years ago.

## Graduation Rate

- $97 \%$ of the senior class received a diploma at the June Graduation ceremony. This was a $2 \%$ increase from the previous year, and a $17 \%$ increase from three years ago.

## Course Enrollment for Graduating Seniors

- $45 \%$ of the graduating seniors completed 4 years of Math, a decrease of $5 \%$ from the previous year and a ranking of Benchmark 3.
- $41 \%$ of the graduating seniors completed 3 years of a foreign language, an $11 \%$ decrease from the previous year and a ranking of Benchmark 3.
- $88 \%$ of the RSTA graduates majored in a technical program meeting the Standard of Excellence.

## Dropout Rate

- The dropout rate for the 2005/2006 academic year at CRLS was $2.7 \%$. This was an increase from the previous year of $1.4 \%$. This was the first year that the DOE included summer dropouts in its dropout calculation. The DOE publishes the preceding year's dropout rate in March of the following school year. The 2006/2007 dropout rate will be published in March 2008.

## Student Subgroups

- All student subgroups are at Benchmark 4 or above having passed both MCAS exams before the end of their senior year. The one exception is LEP students (88\%).

## Areas of Focus

- LEP students continue to graduate at lower rates than the other subgroups. Ranked at Benchmark 1, less than $85 \%$ of these students graduated in June.
- Hispanic and Low Income graduates were less likely to have completed 4 years of Math than other subgroups. They ranked at Benchmark 2 on this indicator.
- African American, Hispanic and Low Income graduates were less likely to have completed 3 years of a foreign language than other subgroups. They ranked at Benchmark 2 on this indicator.
- SPED students were below Benchmark 1 on both of the above indicators.

## GRADES

- The percentage of students with a GPA greater than A- remained the same at $15 \%$.
- The percentage of students with a GPA lower than C- decreased to $17 \%$ from $19 \%$ in the previous year. Over the past two years, there has been a $4 \%$ decrease in this indicator.
- The percentage of students failing two or more courses also decreased by $2 \%$ to $7 \%$ last year. Over the past two years, there has been a $4 \%$ decrease in this indicator.

## Student Subgroups

- More than $25 \%$ of White and Asian students have a GPA greater than A- meeting the Standard of Excellence Benchmark.
- Fewer African American, Low Income, and Special Education students failed two or more courses than in previous years.

## Areas of Focus

- African American, Hispanic, Special Education and F/R Lunch students were much less likely to have a GPA greater than A-.
- While the percentage of African American, Hispanic and Low Income students having a GPA of Cor below remained the same, more Special Education students had a GPA of C- or below (43\%) than in previous years.
- More than $10 \%$ of all Hispanic, Multi-racial, and Special Needs students failed two or more courses ranking them at Benchmark 3 on this indicator.

## School Climate Indicators

## Attendance

- The attendance rate decreased by $1 \%$ to $93 \%$. This is a $2 \%$ increase over two years ago.

## Discipline

- There was a decline in the overall percentage of students having more than one infraction from 38\% to $32 \%$. This is a $15 \%$ decline in the past two years.

## Student \& Staff Participation in School Sponsored Extra Curricular Activities

- There was an increase in the percentage of students participating in activities from $45 \%$ to $46 \%$ last year.
- There was an increase in the percentage of staff serving as school sponsored extra/co-curricular activity advisors, sponsors and coaches from 31\% in 2005-06 to 35\% of the staff.

## Student Subgroups

- LEP (94\%) and Asian (94\%) students had higher attendance rates than other subgroups.
- All subgroups had fewer students with one or more infractions.

## Areas of Focus

- Multi-racial (92\%), Hispanic (92\%) and Low Income (92\%) students were more likely to have lower rates of attendance than students in other subgroups.
- Special Education students were more likely to commit infractions than other students; $55 \%$ of all Special Education students committed one or more infractions.

## Benchmarks Glossary

## Benchmarks Glossary November 2007

| AP | Advanced Placement courses are offered at the high school. There are also AP tests to determine student proficiency in those courses. Participation in AP courses is highly desirable for entrance into college. |
| :---: | :---: |
| Benchmarks | Fixed points along a continuum of growth towards proficiency in a particular area. |
| COP | Certificate of Occupational Proficiency - Awarded to RSTA seniors only |
| DETAIL | A detailed discipline report of CRLS student infractions presented to the School Committee monthly. |
| Effective School Battery | A survey measuring school climate administered to teachers K-12 and students 6-12. |
| ELL | English Language Learner |
| GAP Indicators | The performance among NCLB subgroups as compared to the standard. |
| GPA | Grade Point Average. A point system that reflects the average of students' grades. |
| LEP | Limited English Proficient |
| MCAS C.D. | MCAS Competency Determination - status achieved by CRLS students once they have passed both the MCAS English and MCAS Math tests. It is necessary for graduation. |
| MCAS - ELA | Massachusetts Comprehensive Assessment System English Language Arts |
| MELA-O | Massachusetts English Language Assessment-Oral; required by the state of ELL students K-12 |
|  | Massachusetts English Proficiency Assessment - Reading and Writing. Measures ELL students' English Language Proficiency against Massachusetts |
| MEPA - R/W | State Standards. |
| PSAT | Pre-Scholastic Achievement Test - serves as an opportunity for students to have an experience like the SAT. Determines eligibility for National Merit Award. |
| Primary Indicators | The first, most critical measure of school progress, i.e. proficiency of all students on the MCAS |
| SAT | Scholastic Achievement Test - required of most colleges as a condition of acceptance. |
| Secondary Indicators | Other measures of school progress that may contribute to, or indicate progress towards, proficiency on the MCAS. |

## INTRODUCTION

## What are the CPS Benchmarks of Student Achievement?

The Cambridge Public Schools (CPS) Benchmarks were developed by principals and central office administrators from standards derived through state testing programs, TIMSS (Trends in International Mathematics and Science Study), standards in other states, and accepted research from experts in the field of education. The benchmark documents are a result of a review of this body of knowledge tempered by the experience of CPS administrators, teachers, and school councils. They serve as an accountability tool for schools and the district. In addition, the benchmarks help the community understand overall student achievement and progress in closing the achievement gap in our city's schools.

The CPS Benchmarks are comprehensive including primary and secondary indicators of achievement. Primary indicators are those set by the federal government's No Child Left Behind (NCLB) Act. Primary indicators include a standard of proficiency in English Language Arts (ELA) and Mathematics as measured by MCAS, the Massachusetts state testing program. Secondary indicators include additional academic assessments as well as measures of school climate, family participation / satisfaction, assessments of English Language Learners, Cambridge Rindge and Latin (CRLS) graduation indicators, and competencies for Rindge School of Technical Arts (RSTA).

Benchmarks are determined for individual schools and the district and are organized by grade levels K-5, 6-8 and 9-12. They are also determined for subgroups of students in order to measure the extent to which the school/ district has addressed the achievement gap. Students are categorized into subgroups as defined by the NCLB legislation.

Reports included in this document represent three years of benchmark data. Benchmark reports are used in assessing student outcomes in each school and overall progress of the school district. Individual school benchmarks are used by the school in annual school improvement planning and by the superintendent as one piece of the evaluation of principals. The district uses benchmarks to measure: progress in overall student achievement, the extent to which progress is made in closing the achievement gap among subgroups of students, the efficacy of existing programs, and the need for revisions in the District Improvement Plan.

## How Do I Read the Benchmark Document?

The broad categories are listed along the left hand side of the document. They include: testing, school climate, course enrollment, grades and graduation requirements. Specific indicators are listed within each category. MCAS proficiency in English Language Arts and Mathematics are considered primary indicators as measured by the No Child Left Behind (NCLB) federal requirements. All other indicators including MCAS passing rates are considered secondary indicators.

Indicators include:

## Academic Achievement Data

- MCAS (3-10) including alternate MCAS assessments for special education students
- Early Literacy Assessment in reading and writing (K-2)
- Literacy Collaborative Reading Assessment (3-5)
- Report card grades ( 6-12)
- Course failure rates (6-12)
- SAT
- PSAT
- AP (Advanced Placement course enrollment and exam pass rates)

## School Climate Information

- Discipline report
- Attendance
- Effective School Battery results ( teachers K-12, students 6-12)
- Parent participation in Student Conferences (K-8)
- Student participation in school sponsored extra curricula activities (9-12)
- Staff participation as advisors, sponsors, coaches in extra curricula activities (9-12)

## Assessments for English Language Learners

- MELA-O (English Proficiency testing for English Language Learners) K-2
- MEPA R/W ( Massachusetts English Proficiency Assessment in Reading and Writing for ELL students)

## RSTA Indicators

- RSTA field placement
- Career certification (RSTA)

## Graduation Indicators CRLS

- MCAS Competency Determination
- Graduation rate
- Dropout rate

## Establishing Benchmarks

Data from 2004-2005, 2005-2006 and 2006-2007 are listed next to each indicator and are used to determine growth from one year to the next. The next five (5) columns represent a continuum of progress in each area from Benchmark 1 being lowest to a Standard of Excellence. Data from 2006-07 is used to determine which benchmark is highlighted in yellow. When progress is not sufficient to reach Benchmark 1, the indicator box is highlighted.

Often a school will show improvement in values but will not move up a benchmark in a year. The goal is to see improvement from one year to the next.

## How will this document address the achievement gap in our schools?

Overall progress in each indicator is first reported for the aggregate (all students) within a school or in the district. Progress on each indicator is then reported for each subgroup of students. In determining the achievement gap for any indicator, the progress of students in a racial/ethnic subgroup is measured against the standard of proficiency.

Progress was reported for the MCAS \& CPS Literacy Assessments when there were 10 or more students in the subgroup. For all other indicators, the subgroups needed to have 20 or more students to have their results reported. The subgroups are those defined by NCLB legislation and are the same as those reported on schools' Adequate Yearly Progress (AYP) reports. They include:

- African American/ Black
- Asian
- Hispanic
- White
- Multi-Race, Non-Hispanic
- Students receiving Free/ Reduced Lunch
- Special Education
- LEP (Limited English Proficient)

## How is this information connected to district and school improvement planning?

Benchmark data is used by the district and schools as a part of on-going improvement planning. Each school is responsible for summarizing overall achievement, showing progress in closing the achievement gap, and identifying specific areas of concern and focus. This information becomes part of the district/school's improvement plan. Each year the data is updated, progress is reviewed and School Improvement Plans are updated as part of a continuous improvement cycle.

The following pages include a summary of highlights from the district Benchmark Reports. As in the case of the schools, the district will incorporate this information into its revised District Improvement Plan for the upcoming school year.

* 2006 was the first year that teachers in grades 3 -5 administered the Benchmark Reading Assessment. This assessment is a diagnostic tool for reading instruction and is also used to determine independent reading levels based upon a high standard. Therefore, two different measures of reading on grade level are used: MCAS and Literacy Collaborative assessments.

## Benchmarks Glossary

## Benchmarks Glossary November 2007

| AP | Advanced Placement courses are offered at the high school. There are also AP tests to determine student proficiency in those courses. Participation in AP courses is highly desirable for entrance into college. |
| :---: | :---: |
| Benchmarks | Fixed points along a continuum of growth towards proficiency in a particular area. |
| COP | Certificate of Occupational Proficiency - Awarded to RSTA seniors only |
| DETAIL | A detailed discipline report of CRLS student infractions presented to the School Committee monthly. |
| Effective School Battery | A survey measuring school climate administered to teachers K-12 and students 6-12. |
| ELL | English Language Learner |
| GAP Indicators | The performance among NCLB subgroups as compared to the standard. |
| GPA | Grade Point Average. A point system that reflects the average of students' grades. |
| LEP | Limited English Proficient |
| MCAS C.D. | MCAS Competency Determination - status achieved by CRLS students once they have passed both the MCAS English and MCAS Math tests. It is necessary for graduation. |
| MCAS - ELA | Massachusetts Comprehensive Assessment System English Language Arts |
| MELA-O | Massachusetts English Language Assessment-Oral; required by the state of ELL students K-12 |
|  | Massachusetts English Proficiency Assessment - Reading and Writing. Measures ELL students' English Language Proficiency against Massachusetts |
| MEPA - R/W | State Standards. |
| PSAT | Pre-Scholastic Achievement Test - serves as an opportunity for students to have an experience like the SAT. Determines eligibility for National Merit Award. |
| Primary Indicators | The first, most critical measure of school progress, i.e. proficiency of all students on the MCAS |
| SAT | Scholastic Achievement Test - required of most colleges as a condition of acceptance. |
| Secondary Indicators | Other measures of school progress that may contribute to, or indicate progress towards, proficiency on the MCAS. |

## INTRODUCTION

## What are the CPS Benchmarks of Student Achievement?

The Cambridge Public Schools (CPS) Benchmarks were developed by principals and central office administrators from standards derived through state testing programs, TIMSS (Trends in International Mathematics and Science Study), standards in other states, and accepted research from experts in the field of education. The benchmark documents are a result of a review of this body of knowledge tempered by the experience of CPS administrators, teachers, and school councils. They serve as an accountability tool for schools and the district. In addition, the benchmarks help the community understand overall student achievement and progress in closing the achievement gap in our city's schools.

The CPS Benchmarks are comprehensive including primary and secondary indicators of achievement. Primary indicators are those set by the federal government's No Child Left Behind (NCLB) Act. Primary indicators include a standard of proficiency in English Language Arts (ELA) and Mathematics as measured by MCAS, the Massachusetts state testing program. Secondary indicators include additional academic assessments as well as measures of school climate, family participation / satisfaction, assessments of English Language Learners, Cambridge Rindge and Latin (CRLS) graduation indicators, and competencies for Rindge School of Technical Arts (RSTA).

Benchmarks are determined for individual schools and the district and are organized by grade levels K-5, 6-8 and 9-12. They are also determined for subgroups of students in order to measure the extent to which the school/ district has addressed the achievement gap. Students are categorized into subgroups as defined by the NCLB legislation.

Reports included in this document represent three years of benchmark data. Benchmark reports are used in assessing student outcomes in each school and overall progress of the school district. Individual school benchmarks are used by the school in annual school improvement planning and by the superintendent as one piece of the evaluation of principals. The district uses benchmarks to measure: progress in overall student achievement, the extent to which progress is made in closing the achievement gap among subgroups of students, the efficacy of existing programs, and the need for revisions in the District Improvement Plan.

## How Do I Read the Benchmark Document?

The broad categories are listed along the left hand side of the document. They include: testing, school climate, course enrollment, grades and graduation requirements. Specific indicators are listed within each category. MCAS proficiency in English Language Arts and Mathematics are considered primary indicators as measured by the No Child Left Behind (NCLB) federal requirements. All other indicators including MCAS passing rates are considered secondary indicators.

Indicators include:

## Academic Achievement Data

- MCAS (3-10) including alternate MCAS assessments for special education students
- Early Literacy Assessment in reading and writing (K-2)
- Literacy Collaborative Reading Assessment (3-5)
- Report card grades ( 6-12)
- Course failure rates (6-12)
- SAT
- PSAT
- AP (Advanced Placement course enrollment and exam pass rates)

## School Climate Information

- Discipline report
- Attendance
- Effective School Battery results ( teachers K-12, students 6-12)
- Parent participation in Student Conferences (K-8)
- Student participation in school sponsored extra curricula activities (9-12)
- Staff participation as advisors, sponsors, coaches in extra curricula activities (9-12)

## Assessments for English Language Learners

- MELA-O (English Proficiency testing for English Language Learners) K-2
- MEPA R/W ( Massachusetts English Proficiency Assessment in Reading and Writing for ELL students)

## RSTA Indicators

- RSTA field placement
- Career certification (RSTA)

## Graduation Indicators CRLS

- MCAS Competency Determination
- Graduation rate
- Dropout rate

## Establishing Benchmarks

Data from 2004-2005, 2005-2006 and 2006-2007 are listed next to each indicator and are used to determine growth from one year to the next. The next five (5) columns represent a continuum of progress in each area from Benchmark 1 being lowest to a Standard of Excellence. Data from 2006-07 is used to determine which benchmark is highlighted in yellow. When progress is not sufficient to reach Benchmark 1, the indicator box is highlighted.

Often a school will show improvement in values but will not move up a benchmark in a year. The goal is to see improvement from one year to the next.

## How will this document address the achievement gap in our schools?

Overall progress in each indicator is first reported for the aggregate (all students) within a school or in the district. Progress on each indicator is then reported for each subgroup of students. In determining the achievement gap for any indicator, the progress of students in a racial/ethnic subgroup is measured against the standard of proficiency.

Progress was reported for the MCAS \& CPS Literacy Assessments when there were 10 or more students in the subgroup. For all other indicators, the subgroups needed to have 20 or more students to have their results reported. The subgroups are those defined by NCLB legislation and are the same as those reported on schools' Adequate Yearly Progress (AYP) reports. They include:

- African American/ Black
- Asian
- Hispanic
- White
- Multi-Race, Non-Hispanic
- Students receiving Free/ Reduced Lunch
- Special Education
- LEP (Limited English Proficient)

## How is this information connected to district and school improvement planning?

Benchmark data is used by the district and schools as a part of on-going improvement planning. Each school is responsible for summarizing overall achievement, showing progress in closing the achievement gap, and identifying specific areas of concern and focus. This information becomes part of the district/school's improvement plan. Each year the data is updated, progress is reviewed and School Improvement Plans are updated as part of a continuous improvement cycle.

The following pages include a summary of highlights from the district Benchmark Reports. As in the case of the schools, the district will incorporate this information into its revised District Improvement Plan for the upcoming school year.

|  | $3^{\text {rd }}$ Grade <br> Literacy Collaborative Reading Assessment | $\begin{gathered} \text { given } \\ \text { in } \\ 2005- \\ 2006 \end{gathered}$ | 83\% | 77\% | Percentage of students reaching proficiency is at least $\mathbf{4 0 \%}$ | Percentage of students reaching proficiency is at least $\mathbf{5 0 \%}$ | Percentage of students reaching proficiency is at least $\mathbf{6 0 \%}$ | Percentage of students reaching proficiency is at least 75\% | Percentage of students reaching proficiency is at least $\mathbf{9 0 \%}$ |
|  | Literacy Collaborative Reading Assessment (grades 3-5) | $\begin{gathered} \text { given } \\ \text { in } \\ 2005- \\ 2006 \end{gathered}$ | 77\% | 73\% | Percentage of students reaching proficiency is at least $\mathbf{4 0 \%}$ | Percentage of students reaching proficiency is at least $\mathbf{5 0 \%}$ | Percentage of students reaching proficiency is at least $\mathbf{6 0 \%}$ | Percentage of students reaching proficiency is at least 75\% | Percentage of students reaching proficiency is at least $\mathbf{9 0 \%}$ |

2006 was the first year that teachers in grades 3-5 administered the Benchmark Reading Assessment. This assessment is a diagnostic tool for reading instruction and is also used to determine independent reading levels based upon a high standard. Therefore, two different measures of reading on grade level are used: MCAS and Literacy Collaborative assessments.

## Benchmarks Glossary

## Benchmarks Glossary November 2007

| AP | Advanced Placement courses are offered at the high school. There are also AP tests to determine student proficiency in those courses. Participation in AP courses is highly desirable for entrance into college. |
| :---: | :---: |
| Benchmarks | Fixed points along a continuum of growth towards proficiency in a particular area. |
| COP | Certificate of Occupational Proficiency - Awarded to RSTA seniors only |
| DETAIL | A detailed discipline report of CRLS student infractions presented to the School Committee monthly. |
| Effective School Battery | A survey measuring school climate administered to teachers K-12 and students 6-12. |
| ELL | English Language Learner |
| GAP Indicators | The performance among NCLB subgroups as compared to the standard. |
| GPA | Grade Point Average. A point system that reflects the average of students' grades. |
| LEP | Limited English Proficient |
| MCAS C.D. | MCAS Competency Determination - status achieved by CRLS students once they have passed both the MCAS English and MCAS Math tests. It is necessary for graduation. |
| MCAS - ELA | Massachusetts Comprehensive Assessment System English Language Arts |
| MELA-O | Massachusetts English Language Assessment-Oral; required by the state of ELL students K-12 |
|  | Massachusetts English Proficiency Assessment - Reading and Writing. Measures ELL students' English Language Proficiency against Massachusetts |
| MEPA - R/W | State Standards. |
| PSAT | Pre-Scholastic Achievement Test - serves as an opportunity for students to have an experience like the SAT. Determines eligibility for National Merit Award. |
| Primary Indicators | The first, most critical measure of school progress, i.e. proficiency of all students on the MCAS |
| SAT | Scholastic Achievement Test - required of most colleges as a condition of acceptance. |
| Secondary Indicators | Other measures of school progress that may contribute to, or indicate progress towards, proficiency on the MCAS. |

## INTRODUCTION

## What are the CPS Benchmarks of Student Achievement?

The Cambridge Public Schools (CPS) Benchmarks were developed by principals and central office administrators from standards derived through state testing programs, TIMSS (Trends in International Mathematics and Science Study), standards in other states, and accepted research from experts in the field of education. The benchmark documents are a result of a review of this body of knowledge tempered by the experience of CPS administrators, teachers, and school councils. They serve as an accountability tool for schools and the district. In addition, the benchmarks help the community understand overall student achievement and progress in closing the achievement gap in our city's schools.

The CPS Benchmarks are comprehensive including primary and secondary indicators of achievement. Primary indicators are those set by the federal government's No Child Left Behind (NCLB) Act. Primary indicators include a standard of proficiency in English Language Arts (ELA) and Mathematics as measured by MCAS, the Massachusetts state testing program. Secondary indicators include additional academic assessments as well as measures of school climate, family participation / satisfaction, assessments of English Language Learners, Cambridge Rindge and Latin (CRLS) graduation indicators, and competencies for Rindge School of Technical Arts (RSTA).

Benchmarks are determined for individual schools and the district and are organized by grade levels K-5, 6-8 and 9-12. They are also determined for subgroups of students in order to measure the extent to which the school/ district has addressed the achievement gap. Students are categorized into subgroups as defined by the NCLB legislation.

Reports included in this document represent three years of benchmark data. Benchmark reports are used in assessing student outcomes in each school and overall progress of the school district. Individual school benchmarks are used by the school in annual school improvement planning and by the superintendent as one piece of the evaluation of principals. The district uses benchmarks to measure: progress in overall student achievement, the extent to which progress is made in closing the achievement gap among subgroups of students, the efficacy of existing programs, and the need for revisions in the District Improvement Plan.

## How Do I Read the Benchmark Document?

The broad categories are listed along the left hand side of the document. They include: testing, school climate, course enrollment, grades and graduation requirements. Specific indicators are listed within each category. MCAS proficiency in English Language Arts and Mathematics are considered primary indicators as measured by the No Child Left Behind (NCLB) federal requirements. All other indicators including MCAS passing rates are considered secondary indicators.

Indicators include:

## Academic Achievement Data

- MCAS (3-10) including alternate MCAS assessments for special education students
- Early Literacy Assessment in reading and writing (K-2)
- Literacy Collaborative Reading Assessment (3-5)
- Report card grades ( 6-12)
- Course failure rates (6-12)
- SAT
- PSAT
- AP (Advanced Placement course enrollment and exam pass rates)

## School Climate Information

- Discipline report
- Attendance
- Effective School Battery results ( teachers K-12, students 6-12)
- Parent participation in Student Conferences (K-8)
- Student participation in school sponsored extra curricula activities (9-12)
- Staff participation as advisors, sponsors, coaches in extra curricula activities (9-12)

## Assessments for English Language Learners

- MELA-O (English Proficiency testing for English Language Learners) K-2
- MEPA R/W ( Massachusetts English Proficiency Assessment in Reading and Writing for ELL students)

## RSTA Indicators

- RSTA field placement
- Career certification (RSTA)

## Graduation Indicators CRLS

- MCAS Competency Determination
- Graduation rate
- Dropout rate

## Establishing Benchmarks

Data from 2004-2005, 2005-2006 and 2006-2007 are listed next to each indicator and are used to determine growth from one year to the next. The next five (5) columns represent a continuum of progress in each area from Benchmark 1 being lowest to a Standard of Excellence. Data from 2006-07 is used to determine which benchmark is highlighted in yellow. When progress is not sufficient to reach Benchmark 1, the indicator box is highlighted.

Often a school will show improvement in values but will not move up a benchmark in a year. The goal is to see improvement from one year to the next.

## How will this document address the achievement gap in our schools?

Overall progress in each indicator is first reported for the aggregate (all students) within a school or in the district. Progress on each indicator is then reported for each subgroup of students. In determining the achievement gap for any indicator, the progress of students in a racial/ethnic subgroup is measured against the standard of proficiency.

Progress was reported for the MCAS \& CPS Literacy Assessments when there were 10 or more students in the subgroup. For all other indicators, the subgroups needed to have 20 or more students to have their results reported. The subgroups are those defined by NCLB legislation and are the same as those reported on schools' Adequate Yearly Progress (AYP) reports. They include:

- African American/ Black
- Asian
- Hispanic
- White
- Multi-Race, Non-Hispanic
- Students receiving Free/ Reduced Lunch
- Special Education
- LEP (Limited English Proficient)

## How is this information connected to district and school improvement planning?

Benchmark data is used by the district and schools as a part of on-going improvement planning. Each school is responsible for summarizing overall achievement, showing progress in closing the achievement gap, and identifying specific areas of concern and focus. This information becomes part of the district/school's improvement plan. Each year the data is updated, progress is reviewed and School Improvement Plans are updated as part of a continuous improvement cycle.

The following pages include a summary of highlights from the district Benchmark Reports. As in the case of the schools, the district will incorporate this information into its revised District Improvement Plan for the upcoming school year.

| 品 | Literacy Collaborative Reading Assessment (grades 3-5) | $\begin{gathered} \text { given } \\ \text { in } \\ 2005- \\ 2006 \end{gathered}$ | 62\% | 78\% | Percentage of students reaching proficiency is at least 40\% | Percentage of students reaching proficiency is at least $\mathbf{5 0 \%}$ | Percentage of students reaching proficiency is at least $\mathbf{6 0 \%}$ | Percentage of students reaching proficiency is at least 75\% | Percentage of students reaching proficiency is at least $\mathbf{9 0 \%}$ |

2006 was the first year that teachers in grades 3-5 administered the Benchmark Reading Assessment. This assessment is a diagnostic tool for reading instruction and is also used to determine independent reading levels based upon a high standard. Therefore, two different measures of reading on grade level are used: MCAS and Literacy Collaborative assessments.

## Benchmarks Glossary

## Benchmarks Glossary November 2007

| AP | Advanced Placement courses are offered at the high school. There are also AP tests to determine student proficiency in those courses. Participation in AP courses is highly desirable for entrance into college. |
| :---: | :---: |
| Benchmarks | Fixed points along a continuum of growth towards proficiency in a particular area. |
| COP | Certificate of Occupational Proficiency - Awarded to RSTA seniors only |
| DETAIL | A detailed discipline report of CRLS student infractions presented to the School Committee monthly. |
| Effective School Battery | A survey measuring school climate administered to teachers K-12 and students 6-12. |
| ELL | English Language Learner |
| GAP Indicators | The performance among NCLB subgroups as compared to the standard. |
| GPA | Grade Point Average. A point system that reflects the average of students' grades. |
| LEP | Limited English Proficient |
| MCAS C.D. | MCAS Competency Determination - status achieved by CRLS students once they have passed both the MCAS English and MCAS Math tests. It is necessary for graduation. |
| MCAS - ELA | Massachusetts Comprehensive Assessment System English Language Arts |
| MELA-O | Massachusetts English Language Assessment-Oral; required by the state of ELL students K-12 |
|  | Massachusetts English Proficiency Assessment - Reading and Writing. Measures ELL students' English Language Proficiency against Massachusetts |
| MEPA - R/W | State Standards. |
| PSAT | Pre-Scholastic Achievement Test - serves as an opportunity for students to have an experience like the SAT. Determines eligibility for National Merit Award. |
| Primary Indicators | The first, most critical measure of school progress, i.e. proficiency of all students on the MCAS |
| SAT | Scholastic Achievement Test - required of most colleges as a condition of acceptance. |
| Secondary Indicators | Other measures of school progress that may contribute to, or indicate progress towards, proficiency on the MCAS. |

## INTRODUCTION

## What are the CPS Benchmarks of Student Achievement?

The Cambridge Public Schools (CPS) Benchmarks were developed by principals and central office administrators from standards derived through state testing programs, TIMSS (Trends in International Mathematics and Science Study), standards in other states, and accepted research from experts in the field of education. The benchmark documents are a result of a review of this body of knowledge tempered by the experience of CPS administrators, teachers, and school councils. They serve as an accountability tool for schools and the district. In addition, the benchmarks help the community understand overall student achievement and progress in closing the achievement gap in our city's schools.

The CPS Benchmarks are comprehensive including primary and secondary indicators of achievement. Primary indicators are those set by the federal government's No Child Left Behind (NCLB) Act. Primary indicators include a standard of proficiency in English Language Arts (ELA) and Mathematics as measured by MCAS, the Massachusetts state testing program. Secondary indicators include additional academic assessments as well as measures of school climate, family participation / satisfaction, assessments of English Language Learners, Cambridge Rindge and Latin (CRLS) graduation indicators, and competencies for Rindge School of Technical Arts (RSTA).

Benchmarks are determined for individual schools and the district and are organized by grade levels K-5, 6-8 and 9-12. They are also determined for subgroups of students in order to measure the extent to which the school/ district has addressed the achievement gap. Students are categorized into subgroups as defined by the NCLB legislation.

Reports included in this document represent three years of benchmark data. Benchmark reports are used in assessing student outcomes in each school and overall progress of the school district. Individual school benchmarks are used by the school in annual school improvement planning and by the superintendent as one piece of the evaluation of principals. The district uses benchmarks to measure: progress in overall student achievement, the extent to which progress is made in closing the achievement gap among subgroups of students, the efficacy of existing programs, and the need for revisions in the District Improvement Plan.

## How Do I Read the Benchmark Document?

The broad categories are listed along the left hand side of the document. They include: testing, school climate, course enrollment, grades and graduation requirements. Specific indicators are listed within each category. MCAS proficiency in English Language Arts and Mathematics are considered primary indicators as measured by the No Child Left Behind (NCLB) federal requirements. All other indicators including MCAS passing rates are considered secondary indicators.

Indicators include:

## Academic Achievement Data

- MCAS (3-10) including alternate MCAS assessments for special education students
- Early Literacy Assessment in reading and writing (K-2)
- Literacy Collaborative Reading Assessment (3-5)
- Report card grades ( 6-12)
- Course failure rates (6-12)
- SAT
- PSAT
- AP (Advanced Placement course enrollment and exam pass rates)

## School Climate Information

- Discipline report
- Attendance
- Effective School Battery results ( teachers K-12, students 6-12)
- Parent participation in Student Conferences (K-8)
- Student participation in school sponsored extra curricula activities (9-12)
- Staff participation as advisors, sponsors, coaches in extra curricula activities (9-12)

## Assessments for English Language Learners

- MELA-O (English Proficiency testing for English Language Learners) K-2
- MEPA R/W ( Massachusetts English Proficiency Assessment in Reading and Writing for ELL students)

## RSTA Indicators

- RSTA field placement
- Career certification (RSTA)

## Graduation Indicators CRLS

- MCAS Competency Determination
- Graduation rate
- Dropout rate

## Establishing Benchmarks

Data from 2004-2005, 2005-2006 and 2006-2007 are listed next to each indicator and are used to determine growth from one year to the next. The next five (5) columns represent a continuum of progress in each area from Benchmark 1 being lowest to a Standard of Excellence. Data from 2006-07 is used to determine which benchmark is highlighted in yellow. When progress is not sufficient to reach Benchmark 1, the indicator box is highlighted.

Often a school will show improvement in values but will not move up a benchmark in a year. The goal is to see improvement from one year to the next.

## How will this document address the achievement gap in our schools?

Overall progress in each indicator is first reported for the aggregate (all students) within a school or in the district. Progress on each indicator is then reported for each subgroup of students. In determining the achievement gap for any indicator, the progress of students in a racial/ethnic subgroup is measured against the standard of proficiency.

Progress was reported for the MCAS \& CPS Literacy Assessments when there were 10 or more students in the subgroup. For all other indicators, the subgroups needed to have 20 or more students to have their results reported. The subgroups are those defined by NCLB legislation and are the same as those reported on schools' Adequate Yearly Progress (AYP) reports. They include:

- African American/ Black
- Asian
- Hispanic
- White
- Multi-Race, Non-Hispanic
- Students receiving Free/ Reduced Lunch
- Special Education
- LEP (Limited English Proficient)

## How is this information connected to district and school improvement planning?

Benchmark data is used by the district and schools as a part of on-going improvement planning. Each school is responsible for summarizing overall achievement, showing progress in closing the achievement gap, and identifying specific areas of concern and focus. This information becomes part of the district/school's improvement plan. Each year the data is updated, progress is reviewed and School Improvement Plans are updated as part of a continuous improvement cycle.

The following pages include a summary of highlights from the district Benchmark Reports. As in the case of the schools, the district will incorporate this information into its revised District Improvement Plan for the upcoming school year.

## Benchmarks Glossary

## Benchmarks Glossary November 2007

| AP | Advanced Placement courses are offered at the high school. There are also AP tests to determine student proficiency in those courses. Participation in AP courses is highly desirable for entrance into college. |
| :---: | :---: |
| Benchmarks | Fixed points along a continuum of growth towards proficiency in a particular area. |
| COP | Certificate of Occupational Proficiency - Awarded to RSTA seniors only |
| DETAIL | A detailed discipline report of CRLS student infractions presented to the School Committee monthly. |
| Effective School Battery | A survey measuring school climate administered to teachers K-12 and students 6-12. |
| ELL | English Language Learner |
| GAP Indicators | The performance among NCLB subgroups as compared to the standard. |
| GPA | Grade Point Average. A point system that reflects the average of students' grades. |
| LEP | Limited English Proficient |
| MCAS C.D. | MCAS Competency Determination - status achieved by CRLS students once they have passed both the MCAS English and MCAS Math tests. It is necessary for graduation. |
| MCAS - ELA | Massachusetts Comprehensive Assessment System English Language Arts |
| MELA-O | Massachusetts English Language Assessment-Oral; required by the state of ELL students K-12 |
|  | Massachusetts English Proficiency Assessment - Reading and Writing. Measures ELL students' English Language Proficiency against Massachusetts |
| MEPA - R/W | State Standards. |
| PSAT | Pre-Scholastic Achievement Test - serves as an opportunity for students to have an experience like the SAT. Determines eligibility for National Merit Award. |
| Primary Indicators | The first, most critical measure of school progress, i.e. proficiency of all students on the MCAS |
| SAT | Scholastic Achievement Test - required of most colleges as a condition of acceptance. |
| Secondary Indicators | Other measures of school progress that may contribute to, or indicate progress towards, proficiency on the MCAS. |

## INTRODUCTION

## What are the CPS Benchmarks of Student Achievement?

The Cambridge Public Schools (CPS) Benchmarks were developed by principals and central office administrators from standards derived through state testing programs, TIMSS (Trends in International Mathematics and Science Study), standards in other states, and accepted research from experts in the field of education. The benchmark documents are a result of a review of this body of knowledge tempered by the experience of CPS administrators, teachers, and school councils. They serve as an accountability tool for schools and the district. In addition, the benchmarks help the community understand overall student achievement and progress in closing the achievement gap in our city's schools.

The CPS Benchmarks are comprehensive including primary and secondary indicators of achievement. Primary indicators are those set by the federal government's No Child Left Behind (NCLB) Act. Primary indicators include a standard of proficiency in English Language Arts (ELA) and Mathematics as measured by MCAS, the Massachusetts state testing program. Secondary indicators include additional academic assessments as well as measures of school climate, family participation / satisfaction, assessments of English Language Learners, Cambridge Rindge and Latin (CRLS) graduation indicators, and competencies for Rindge School of Technical Arts (RSTA).

Benchmarks are determined for individual schools and the district and are organized by grade levels K-5, 6-8 and 9-12. They are also determined for subgroups of students in order to measure the extent to which the school/ district has addressed the achievement gap. Students are categorized into subgroups as defined by the NCLB legislation.

Reports included in this document represent three years of benchmark data. Benchmark reports are used in assessing student outcomes in each school and overall progress of the school district. Individual school benchmarks are used by the school in annual school improvement planning and by the superintendent as one piece of the evaluation of principals. The district uses benchmarks to measure: progress in overall student achievement, the extent to which progress is made in closing the achievement gap among subgroups of students, the efficacy of existing programs, and the need for revisions in the District Improvement Plan.

## How Do I Read the Benchmark Document?

The broad categories are listed along the left hand side of the document. They include: testing, school climate, course enrollment, grades and graduation requirements. Specific indicators are listed within each category. MCAS proficiency in English Language Arts and Mathematics are considered primary indicators as measured by the No Child Left Behind (NCLB) federal requirements. All other indicators including MCAS passing rates are considered secondary indicators.

Indicators include:

## Academic Achievement Data

- MCAS (3-10) including alternate MCAS assessments for special education students
- Early Literacy Assessment in reading and writing (K-2)
- Literacy Collaborative Reading Assessment (3-5)
- Report card grades ( 6-12)
- Course failure rates (6-12)
- SAT
- PSAT
- AP (Advanced Placement course enrollment and exam pass rates)

## School Climate Information

- Discipline report
- Attendance
- Effective School Battery results ( teachers K-12, students 6-12)
- Parent participation in Student Conferences (K-8)
- Student participation in school sponsored extra curricula activities (9-12)
- Staff participation as advisors, sponsors, coaches in extra curricula activities (9-12)

## Assessments for English Language Learners

- MELA-O (English Proficiency testing for English Language Learners) K-2
- MEPA R/W ( Massachusetts English Proficiency Assessment in Reading and Writing for ELL students)

## RSTA Indicators

- RSTA field placement
- Career certification (RSTA)

## Graduation Indicators CRLS

- MCAS Competency Determination
- Graduation rate
- Dropout rate

## Establishing Benchmarks

Data from 2004-2005, 2005-2006 and 2006-2007 are listed next to each indicator and are used to determine growth from one year to the next. The next five (5) columns represent a continuum of progress in each area from Benchmark 1 being lowest to a Standard of Excellence. Data from 2006-07 is used to determine which benchmark is highlighted in yellow. When progress is not sufficient to reach Benchmark 1, the indicator box is highlighted.

Often a school will show improvement in values but will not move up a benchmark in a year. The goal is to see improvement from one year to the next.

## How will this document address the achievement gap in our schools?

Overall progress in each indicator is first reported for the aggregate (all students) within a school or in the district. Progress on each indicator is then reported for each subgroup of students. In determining the achievement gap for any indicator, the progress of students in a racial/ethnic subgroup is measured against the standard of proficiency.

Progress was reported for the MCAS \& CPS Literacy Assessments when there were 10 or more students in the subgroup. For all other indicators, the subgroups needed to have 20 or more students to have their results reported. The subgroups are those defined by NCLB legislation and are the same as those reported on schools' Adequate Yearly Progress (AYP) reports. They include:

- African American/ Black
- Asian
- Hispanic
- White
- Multi-Race, Non-Hispanic
- Students receiving Free/ Reduced Lunch
- Special Education
- LEP (Limited English Proficient)

## How is this information connected to district and school improvement planning?

Benchmark data is used by the district and schools as a part of on-going improvement planning. Each school is responsible for summarizing overall achievement, showing progress in closing the achievement gap, and identifying specific areas of concern and focus. This information becomes part of the district/school's improvement plan. Each year the data is updated, progress is reviewed and School Improvement Plans are updated as part of a continuous improvement cycle.

The following pages include a summary of highlights from the district Benchmark Reports. As in the case of the schools, the district will incorporate this information into its revised District Improvement Plan for the upcoming school year.

|  | Literacy Collaborative Reading Assessment* (grades 3-5) | $\begin{gathered} \text { given } \\ \text { in } \\ 2005- \\ 2006 \end{gathered}$ | 77\% | 71\% | Percentage of students reaching proficiency is at least $\mathbf{4 0 \%}$ | Percentage of students reaching proficiency is at least $\mathbf{5 0 \%}$ | Percentage of students reaching proficiency is at least $\mathbf{6 0 \%}$ | Percentage of students reaching proficiency is at least 75\% | Percentage of students reaching proficiency is at least $\mathbf{9 0 \%}$ |

* 2006 was the first year that teachers in grades 3-5 administered the Benchmark Reading Assessment. This assessment is a diagnostic tool for reading instruction and is also used to determine independent reading levels based upon a high standard. Therefore, two different measures of reading on grade level are used: MCAS and Literacy Collaborative assessments.

## Benchmarks Glossary

## Benchmarks Glossary November 2007

| AP | Advanced Placement courses are offered at the high school. There are also AP tests to determine student proficiency in those courses. Participation in AP courses is highly desirable for entrance into college. |
| :---: | :---: |
| Benchmarks | Fixed points along a continuum of growth towards proficiency in a particular area. |
| COP | Certificate of Occupational Proficiency - Awarded to RSTA seniors only |
| DETAIL | A detailed discipline report of CRLS student infractions presented to the School Committee monthly. |
| Effective School Battery | A survey measuring school climate administered to teachers K-12 and students 6-12. |
| ELL | English Language Learner |
| GAP Indicators | The performance among NCLB subgroups as compared to the standard. |
| GPA | Grade Point Average. A point system that reflects the average of students' grades. |
| LEP | Limited English Proficient |
| MCAS C.D. | MCAS Competency Determination - status achieved by CRLS students once they have passed both the MCAS English and MCAS Math tests. It is necessary for graduation. |
| MCAS - ELA | Massachusetts Comprehensive Assessment System English Language Arts |
| MELA-O | Massachusetts English Language Assessment-Oral; required by the state of ELL students K-12 |
|  | Massachusetts English Proficiency Assessment - Reading and Writing. Measures ELL students' English Language Proficiency against Massachusetts |
| MEPA - R/W | State Standards. |
| PSAT | Pre-Scholastic Achievement Test - serves as an opportunity for students to have an experience like the SAT. Determines eligibility for National Merit Award. |
| Primary Indicators | The first, most critical measure of school progress, i.e. proficiency of all students on the MCAS |
| SAT | Scholastic Achievement Test - required of most colleges as a condition of acceptance. |
| Secondary Indicators | Other measures of school progress that may contribute to, or indicate progress towards, proficiency on the MCAS. |

## INTRODUCTION

## What are the CPS Benchmarks of Student Achievement?

The Cambridge Public Schools (CPS) Benchmarks were developed by principals and central office administrators from standards derived through state testing programs, TIMSS (Trends in International Mathematics and Science Study), standards in other states, and accepted research from experts in the field of education. The benchmark documents are a result of a review of this body of knowledge tempered by the experience of CPS administrators, teachers, and school councils. They serve as an accountability tool for schools and the district. In addition, the benchmarks help the community understand overall student achievement and progress in closing the achievement gap in our city's schools.

The CPS Benchmarks are comprehensive including primary and secondary indicators of achievement. Primary indicators are those set by the federal government's No Child Left Behind (NCLB) Act. Primary indicators include a standard of proficiency in English Language Arts (ELA) and Mathematics as measured by MCAS, the Massachusetts state testing program. Secondary indicators include additional academic assessments as well as measures of school climate, family participation / satisfaction, assessments of English Language Learners, Cambridge Rindge and Latin (CRLS) graduation indicators, and competencies for Rindge School of Technical Arts (RSTA).

Benchmarks are determined for individual schools and the district and are organized by grade levels K-5, 6-8 and 9-12. They are also determined for subgroups of students in order to measure the extent to which the school/ district has addressed the achievement gap. Students are categorized into subgroups as defined by the NCLB legislation.

Reports included in this document represent three years of benchmark data. Benchmark reports are used in assessing student outcomes in each school and overall progress of the school district. Individual school benchmarks are used by the school in annual school improvement planning and by the superintendent as one piece of the evaluation of principals. The district uses benchmarks to measure: progress in overall student achievement, the extent to which progress is made in closing the achievement gap among subgroups of students, the efficacy of existing programs, and the need for revisions in the District Improvement Plan.

## How Do I Read the Benchmark Document?

The broad categories are listed along the left hand side of the document. They include: testing, school climate, course enrollment, grades and graduation requirements. Specific indicators are listed within each category. MCAS proficiency in English Language Arts and Mathematics are considered primary indicators as measured by the No Child Left Behind (NCLB) federal requirements. All other indicators including MCAS passing rates are considered secondary indicators.

Indicators include:

## Academic Achievement Data

- MCAS (3-10) including alternate MCAS assessments for special education students
- Early Literacy Assessment in reading and writing (K-2)
- Literacy Collaborative Reading Assessment (3-5)
- Report card grades ( 6-12)
- Course failure rates (6-12)
- SAT
- PSAT
- AP (Advanced Placement course enrollment and exam pass rates)

## School Climate Information

- Discipline report
- Attendance
- Effective School Battery results ( teachers K-12, students 6-12)
- Parent participation in Student Conferences (K-8)
- Student participation in school sponsored extra curricula activities (9-12)
- Staff participation as advisors, sponsors, coaches in extra curricula activities (9-12)

## Assessments for English Language Learners

- MELA-O (English Proficiency testing for English Language Learners) K-2
- MEPA R/W ( Massachusetts English Proficiency Assessment in Reading and Writing for ELL students)

## RSTA Indicators

- RSTA field placement
- Career certification (RSTA)

## Graduation Indicators CRLS

- MCAS Competency Determination
- Graduation rate
- Dropout rate

## Establishing Benchmarks

Data from 2004-2005, 2005-2006 and 2006-2007 are listed next to each indicator and are used to determine growth from one year to the next. The next five (5) columns represent a continuum of progress in each area from Benchmark 1 being lowest to a Standard of Excellence. Data from 2006-07 is used to determine which benchmark is highlighted in yellow. When progress is not sufficient to reach Benchmark 1, the indicator box is highlighted.

Often a school will show improvement in values but will not move up a benchmark in a year. The goal is to see improvement from one year to the next.

## How will this document address the achievement gap in our schools?

Overall progress in each indicator is first reported for the aggregate (all students) within a school or in the district. Progress on each indicator is then reported for each subgroup of students. In determining the achievement gap for any indicator, the progress of students in a racial/ethnic subgroup is measured against the standard of proficiency.

Progress was reported for the MCAS \& CPS Literacy Assessments when there were 10 or more students in the subgroup. For all other indicators, the subgroups needed to have 20 or more students to have their results reported. The subgroups are those defined by NCLB legislation and are the same as those reported on schools’ Adequate Yearly Progress (AYP) reports. They include:

- African American/ Black
- Asian
- Hispanic
- White
- Multi-Race, Non-Hispanic
- Students receiving Free/ Reduced Lunch
- Special Education
- LEP (Limited English Proficient)

## How is this information connected to district and school improvement planning?

Benchmark data is used by the district and schools as a part of on-going improvement planning. Each school is responsible for summarizing overall achievement, showing progress in closing the achievement gap, and identifying specific areas of concern and focus. This information becomes part of the district/school's improvement plan. Each year the data is updated, progress is reviewed and School Improvement Plans are updated as part of a continuous improvement cycle.

The following pages include a summary of highlights from the district Benchmark Reports. As in the case of the schools, the district will incorporate this information into its revised District Improvement Plan for the upcoming school year.

* 2006 was the first year that teachers in grades 3-5 administered the Benchmark Reading Assessment. This assessment is a diagnostic tool for reading instruction and is also used to determine independent reading levels based upon a high standard. Therefore, two different measures of reading on grade level are used: MCAS and Literacy Collaborative assessments. **Haggerty School is a READ FIRST School and completed assessments for READ FIRST Program in place of E.L.A assessments in 04/05; in 05/06 a corresponding ELA grade level benchmark was given to students' READING FIRST assessments. In 06/07, ELA assessments were not administered.

## INTRODUCTION

## What are the CPS Benchmarks of Student Achievement?

The Cambridge Public Schools (CPS) Benchmarks were developed by principals and central office administrators from standards derived through state testing programs, TIMSS (Trends in International Mathematics and Science Study), standards in other states, and accepted research from experts in the field of education. The benchmark documents are a result of a review of this body of knowledge tempered by the experience of CPS administrators, teachers, and school councils. They serve as an accountability tool for schools and the district. In addition, the benchmarks help the community understand overall student achievement and progress in closing the achievement gap in our city's schools.

The CPS Benchmarks are comprehensive including primary and secondary indicators of achievement. Primary indicators are those set by the federal government's No Child Left Behind (NCLB) Act. Primary indicators include a standard of proficiency in English Language Arts (ELA) and Mathematics as measured by MCAS, the Massachusetts state testing program. Secondary indicators include additional academic assessments as well as measures of school climate, family participation / satisfaction, assessments of English Language Learners, Cambridge Rindge and Latin (CRLS) graduation indicators, and competencies for Rindge School of Technical Arts (RSTA).

Benchmarks are determined for individual schools and the district and are organized by grade levels K-5, 6-8 and 9-12. They are also determined for subgroups of students in order to measure the extent to which the school/ district has addressed the achievement gap. Students are categorized into subgroups as defined by the NCLB legislation.

Reports included in this document represent three years of benchmark data. Benchmark reports are used in assessing student outcomes in each school and overall progress of the school district. Individual school benchmarks are used by the school in annual school improvement planning and by the superintendent as one piece of the evaluation of principals. The district uses benchmarks to measure: progress in overall student achievement, the extent to which progress is made in closing the achievement gap among subgroups of students, the efficacy of existing programs, and the need for revisions in the District Improvement Plan.

## How Do I Read the Benchmark Document?

The broad categories are listed along the left hand side of the document. They include: testing, school climate, course enrollment, grades and graduation requirements. Specific indicators are listed within each category. MCAS proficiency in English Language Arts and Mathematics are considered primary indicators as measured by the No Child Left Behind (NCLB) federal requirements. All other indicators including MCAS passing rates are considered secondary indicators.

Indicators include:

## Academic Achievement Data

- MCAS (3-10) including alternate MCAS assessments for special education students
- Early Literacy Assessment in reading and writing (K-2)
- Literacy Collaborative Reading Assessment (3-5)
- Report card grades (6-12)
- Course failure rates (6-12)
- SAT
- PSAT
- AP (Advanced Placement course enrollment and exam pass rates)

## School Climate Information

- Discipline report
- Attendance
- Effective School Battery results ( teachers K-12, students 6-12)
- Parent participation in Student Conferences (K-8)
- Student participation in school sponsored extra curricula activities (9-12)
- Staff participation as advisors, sponsors, coaches in extra curricula activities (9-12)

## Assessments for English Language Learners

- MELA-O (English Proficiency testing for English Language Learners) K-2
- MEPA R/W ( Massachusetts English Proficiency Assessment in Reading and Writing for ELL students)

## RSTA Indicators

- RSTA field placement
- Career certification (RSTA)

## Graduation Indicators CRLS

- MCAS Competency Determination
- Graduation rate
- Dropout rate

## Establishing Benchmarks

Data from 2004-2005, 2005-2006 and 2006-2007 are listed next to each indicator and are used to determine growth from one year to the next. The next five (5) columns represent a continuum of progress in each area from Benchmark 1 being lowest to a Standard of Excellence. Data from 2006-07 is used to determine which benchmark is highlighted in yellow. When progress is not sufficient to reach Benchmark 1, the indicator box is highlighted.

Often a school will show improvement in values but will not move up a benchmark in a year. The goal is to see improvement from one year to the next.

## How will this document address the achievement gap in our schools?

Overall progress in each indicator is first reported for the aggregate (all students) within a school or in the district. Progress on each indicator is then reported for each subgroup of students. In determining the achievement gap for any indicator, the progress of students in a racial/ethnic subgroup is measured against the standard of proficiency.

Progress was reported for the MCAS \& CPS Literacy Assessments when there were 10 or more students in the subgroup. For all other indicators, the subgroups needed to have 20 or more students to have their results reported. The subgroups are those defined by NCLB legislation and are the same as those reported on schools' Adequate Yearly Progress (AYP) reports. They include:

- African American/ Black
- Asian
- Hispanic
- White
- Multi-Race, Non-Hispanic
- Students receiving Free/ Reduced Lunch
- Special Education
- LEP (Limited English Proficient)

## How is this information connected to district and school improvement planning?

Benchmark data is used by the district and schools as a part of on-going improvement planning. Each school is responsible for summarizing overall achievement, showing progress in closing the achievement gap, and identifying specific areas of concern and focus. This information becomes part of the district/school's improvement plan. Each year the data is updated, progress is reviewed and School Improvement Plans are updated as part of a continuous improvement cycle.

The following pages include a summary of highlights from the district Benchmark Reports. As in the case of the schools, the district will incorporate this information into its revised District Improvement Plan for the upcoming school year.

## INTRODUCTION

## What are the CPS Benchmarks of Student Achievement?

The Cambridge Public Schools (CPS) Benchmarks were developed by principals and central office administrators from standards derived through state testing programs, TIMSS (Trends in International Mathematics and Science Study), standards in other states, and accepted research from experts in the field of education. The benchmark documents are a result of a review of this body of knowledge tempered by the experience of CPS administrators, teachers, and school councils. They serve as an accountability tool for schools and the district. In addition, the benchmarks help the community understand overall student achievement and progress in closing the achievement gap in our city's schools.

The CPS Benchmarks are comprehensive including primary and secondary indicators of achievement. Primary indicators are those set by the federal government's No Child Left Behind (NCLB) Act. Primary indicators include a standard of proficiency in English Language Arts (ELA) and Mathematics as measured by MCAS, the Massachusetts state testing program. Secondary indicators include additional academic assessments as well as measures of school climate, family participation / satisfaction, assessments of English Language Learners, Cambridge Rindge and Latin (CRLS) graduation indicators, and competencies for Rindge School of Technical Arts (RSTA).

Benchmarks are determined for individual schools and the district and are organized by grade levels K-5, 6-8 and 9-12. They are also determined for subgroups of students in order to measure the extent to which the school/ district has addressed the achievement gap. Students are categorized into subgroups as defined by the NCLB legislation.

Reports included in this document represent three years of benchmark data. Benchmark reports are used in assessing student outcomes in each school and overall progress of the school district. Individual school benchmarks are used by the school in annual school improvement planning and by the superintendent as one piece of the evaluation of principals. The district uses benchmarks to measure: progress in overall student achievement, the extent to which progress is made in closing the achievement gap among subgroups of students, the efficacy of existing programs, and the need for revisions in the District Improvement Plan.

## How Do I Read the Benchmark Document?

The broad categories are listed along the left hand side of the document. They include: testing, school climate, course enrollment, grades and graduation requirements. Specific indicators are listed within each category. MCAS proficiency in English Language Arts and Mathematics are considered primary indicators as measured by the No Child Left Behind (NCLB) federal requirements. All other indicators including MCAS passing rates are considered secondary indicators.

Indicators include:

## Academic Achievement Data

- MCAS (3-10) including alternate MCAS assessments for special education students
- Early Literacy Assessment in reading and writing (K-2)
- Literacy Collaborative Reading Assessment (3-5)
- Report card grades ( 6-12)
- Course failure rates (6-12)
- SAT
- PSAT
- AP (Advanced Placement course enrollment and exam pass rates)

## School Climate Information

- Discipline report
- Attendance
- Effective School Battery results ( teachers K-12, students 6-12)
- Parent participation in Student Conferences (K-8)
- Student participation in school sponsored extra curricula activities (9-12)
- Staff participation as advisors, sponsors, coaches in extra curricula activities (9-12)

## Assessments for English Language Learners

- MELA-O (English Proficiency testing for English Language Learners) K-2
- MEPA R/W ( Massachusetts English Proficiency Assessment in Reading and Writing for ELL students)

## RSTA Indicators

- RSTA field placement
- Career certification (RSTA)

## Graduation Indicators CRLS

- MCAS Competency Determination
- Graduation rate
- Dropout rate

## Establishing Benchmarks

Data from 2004-2005, 2005-2006 and 2006-2007 are listed next to each indicator and are used to determine growth from one year to the next. The next five (5) columns represent a continuum of progress in each area from Benchmark 1 being lowest to a Standard of Excellence. Data from 2006-07 is used to determine which benchmark is highlighted in yellow. When progress is not sufficient to reach Benchmark 1, the indicator box is highlighted.

Often a school will show improvement in values but will not move up a benchmark in a year. The goal is to see improvement from one year to the next.

## How will this document address the achievement gap in our schools?

Overall progress in each indicator is first reported for the aggregate (all students) within a school or in the district. Progress on each indicator is then reported for each subgroup of students. In determining the achievement gap for any indicator, the progress of students in a racial/ethnic subgroup is measured against the standard of proficiency.

Progress was reported for the MCAS \& CPS Literacy Assessments when there were 10 or more students in the subgroup. For all other indicators, the subgroups needed to have 20 or more students to have their results reported. The subgroups are those defined by NCLB legislation and are the same as those reported on schools' Adequate Yearly Progress (AYP) reports. They include:

- African American/ Black
- Asian
- Hispanic
- White
- Multi-Race, Non-Hispanic
- Students receiving Free/ Reduced Lunch
- Special Education
- LEP (Limited English Proficient)

## How is this information connected to district and school improvement planning?

Benchmark data is used by the district and schools as a part of on-going improvement planning. Each school is responsible for summarizing overall achievement, showing progress in closing the achievement gap, and identifying specific areas of concern and focus. This information becomes part of the district/school's improvement plan. Each year the data is updated, progress is reviewed and School Improvement Plans are updated as part of a continuous improvement cycle.

The following pages include a summary of highlights from the district Benchmark Reports. As in the case of the schools, the district will incorporate this information into its revised District Improvement Plan for the upcoming school year.

## Elementary Benchmarks Grades K-5

# Middle School Benchmarks Grades 6-8 

## Benchmarks Glossary

## Benchmarks Glossary November 2007

| AP | Advanced Placement courses are offered at the high school. There are also AP tests to determine student proficiency in those courses. Participation in AP courses is highly desirable for entrance into college. |
| :---: | :---: |
| Benchmarks | Fixed points along a continuum of growth towards proficiency in a particular area. |
| COP | Certificate of Occupational Proficiency - Awarded to RSTA seniors only |
| DETAIL | A detailed discipline report of CRLS student infractions presented to the School Committee monthly. |
| Effective School Battery | A survey measuring school climate administered to teachers K-12 and students 6-12. |
| ELL | English Language Learner |
| GAP Indicators | The performance among NCLB subgroups as compared to the standard. |
| GPA | Grade Point Average. A point system that reflects the average of students' grades. |
| LEP | Limited English Proficient |
| MCAS C.D. | MCAS Competency Determination - status achieved by CRLS students once they have passed both the MCAS English and MCAS Math tests. It is necessary for graduation. |
| MCAS - ELA | Massachusetts Comprehensive Assessment System English Language Arts |
| MELA-O | Massachusetts English Language Assessment-Oral; required by the state of ELL students K-12 |
| MEPA - R/W | Massachusetts English Proficiency Assessment - Reading and Writing. Measures ELL students' English Language Proficiency against Massachusetts State Standards. |
| PSAT | Pre-Scholastic Achievement Test - serves as an opportunity for students to have an experience like the SAT. Determines eligibility for National Merit Award. |
| Primary Indicators | The first, most critical measure of school progress, i.e. proficiency of all students on the MCAS |
| SAT | Scholastic Achievement Test - required of most colleges as a condition of acceptance. |
| Secondary Indicators | Other measures of school progress that may contribute to, or indicate progress towards, proficiency on the MCAS. |

* 2006 was the first year that teachers in grades 3-5 administered the Benchmark Reading Assessment. This assessment is a diagnostic tool for reading instruction and is also used to determine independent reading levels based upon a high standard. Therefore, two different measures of reading on grade level are used: MCAS and Literacy Collaborative assessments.

## INTRODUCTION

## What are the CPS Benchmarks of Student Achievement?

The Cambridge Public Schools (CPS) Benchmarks were developed by principals and central office administrators from standards derived through state testing programs, TIMSS (Trends in International Mathematics and Science Study), standards in other states, and accepted research from experts in the field of education. The benchmark documents are a result of a review of this body of knowledge tempered by the experience of CPS administrators, teachers, and school councils. They serve as an accountability tool for schools and the district. In addition, the benchmarks help the community understand overall student achievement and progress in closing the achievement gap in our city's schools.

The CPS Benchmarks are comprehensive including primary and secondary indicators of achievement. Primary indicators are those set by the federal government's No Child Left Behind (NCLB) Act. Primary indicators include a standard of proficiency in English Language Arts (ELA) and Mathematics as measured by MCAS, the Massachusetts state testing program. Secondary indicators include additional academic assessments as well as measures of school climate, family participation / satisfaction, assessments of English Language Learners, Cambridge Rindge and Latin (CRLS) graduation indicators, and competencies for Rindge School of Technical Arts (RSTA).

Benchmarks are determined for individual schools and the district and are organized by grade levels K-5, 6-8 and 912. They are also determined for subgroups of students in order to measure the extent to which the school/ district has addressed the achievement gap. Students are categorized into subgroups as defined by the NCLB legislation.

Reports included in this document represent three years of benchmark data. Benchmark reports are used in assessing student outcomes in each school and overall progress of the school district. Individual school benchmarks are used by the school in annual school improvement planning and by the superintendent as one piece of the evaluation of principals. The district uses benchmarks to measure: progress in overall student achievement, the extent to which progress is made in closing the achievement gap among subgroups of students, the efficacy of existing programs, and the need for revisions in the District Improvement Plan.

## How Do I Read the Benchmark Document?

The broad categories are listed along the left hand side of the document. They include: testing, school climate, course enrollment, grades and graduation requirements. Specific indicators are listed within each category. MCAS proficiency in English Language Arts and Mathematics are considered primary indicators as measured by the No Child Left Behind (NCLB) federal requirements. All other indicators including MCAS passing rates are considered secondary indicators.

Indicators include:

## Academic Achievement Data

- MCAS (3-10) including alternate MCAS assessments for special education students
- Early Literacy Assessment in reading and writing (K-2)
- Literacy Collaborative Reading Assessment (3-5)
- Report card grades (6-12)
- Course failure rates (6-12)
- SAT
- PSAT
- AP (Advanced Placement course enrollment and exam pass rates)

## School Climate Information

- Discipline report
- Attendance
- Effective School Battery results ( teachers K-12, students 6-12)
- Parent participation in Student Conferences (K-8)
- Student participation in school sponsored extra curricula activities (9-12)
- Staff participation as advisors, sponsors, coaches in extra curricula activities (9-12)

## Assessments for English Language Learners

- MELA-O (English Proficiency testing for English Language Learners) K-2
- MEPA R/W ( Massachusetts English Proficiency Assessment in Reading and Writing for ELL students)

## RSTA Indicators

- RSTA field placement
- Career certification (RSTA)

## Graduation Indicators CRLS

- MCAS Competency Determination
- Graduation rate
- Dropout rate

## Establishing Benchmarks

Data from 2004-2005, 2005-2006 and 2006-2007 are listed next to each indicator and are used to determine growth from one year to the next. The next five (5) columns represent a continuum of progress in each area from Benchmark 1 being lowest to a Standard of Excellence. Data from 2006-07 is used to determine which benchmark is highlighted in yellow. When progress is not sufficient to reach Benchmark 1, the indicator box is highlighted.

Often a school will show improvement in values but will not move up a benchmark in a year. The goal is to see improvement from one year to the next.

## How will this document address the achievement gap in our schools?

Overall progress in each indicator is first reported for the aggregate (all students) within a school or in the district. Progress on each indicator is then reported for each subgroup of students. In determining the achievement gap for any indicator, the progress of students in a racial/ethnic subgroup is measured against the standard of proficiency.

Progress was reported for the MCAS \& CPS Literacy Assessments when there were 10 or more students in the subgroup. For all other indicators, the subgroups needed to have 20 or more students to have their results reported. The subgroups are those defined by NCLB legislation and are the same as those reported on schools’ Adequate Yearly Progress (AYP) reports. They include:

- African American/ Black
- Asian
- Hispanic
- White
- Multi-Race, Non-Hispanic
- Students receiving Free/ Reduced Lunch
- Special Education
- LEP (Limited English Proficient)

## How is this information connected to district and school improvement planning?

Benchmark data is used by the district and schools as a part of on-going improvement planning. Each school is responsible for summarizing overall achievement, showing progress in closing the achievement gap, and identifying specific areas of concern and focus. This information becomes part of the district/school's improvement plan. Each year the data is updated, progress is reviewed and School Improvement Plans are updated as part of a continuous improvement cycle.

The following pages include a summary of highlights from the district Benchmark Reports. As in the case of the schools, the district will incorporate this information into its revised District Improvement Plan for the upcoming school year.

## Elementary Benchmarks Grades K-5

# Middle School Benchmarks Grades 6-8 

## Benchmarks Glossary

## Benchmarks Glossary November 2007

| AP | Advanced Placement courses are offered at the high school. There are also AP tests to determine student proficiency in those courses. Participation in AP courses is highly desirable for entrance into college. |
| :---: | :---: |
| Benchmarks | Fixed points along a continuum of growth towards proficiency in a particular area. |
| COP | Certificate of Occupational Proficiency - Awarded to RSTA seniors only |
| DETAIL | A detailed discipline report of CRLS student infractions presented to the School Committee monthly. |
| Effective School Battery | A survey measuring school climate administered to teachers K-12 and students 6-12. |
| ELL | English Language Learner |
| GAP Indicators | The performance among NCLB subgroups as compared to the standard. |
| GPA | Grade Point Average. A point system that reflects the average of students' grades. |
| LEP | Limited English Proficient |
| MCAS C.D. | MCAS Competency Determination - status achieved by CRLS students once they have passed both the MCAS English and MCAS Math tests. It is necessary for graduation. |
| MCAS - ELA | Massachusetts Comprehensive Assessment System English Language Arts |
| MELA-O | Massachusetts English Language Assessment-Oral; required by the state of ELL students K-12 |
| MEPA - R/W | Massachusetts English Proficiency Assessment - Reading and Writing. Measures ELL students' English Language Proficiency against Massachusetts State Standards. |
| PSAT | Pre-Scholastic Achievement Test - serves as an opportunity for students to have an experience like the SAT. Determines eligibility for National Merit Award. |
| Primary Indicators | The first, most critical measure of school progress, i.e. proficiency of all students on the MCAS |
| SAT | Scholastic Achievement Test - required of most colleges as a condition of acceptance. |
| Secondary Indicators | Other measures of school progress that may contribute to, or indicate progress towards, proficiency on the MCAS. |

|  | Literacy Collaborative Reading Assessment* (grades 3-5) | $\begin{gathered} \text { given } \\ \text { in } \\ 2005- \\ 2006 \end{gathered}$ | 60\% | 59\% | Percentage of students reaching proficiency is at least 40\% | Percentage of students reaching proficiency is at least $\mathbf{5 0 \%}$ | Percentage of students reaching proficiency is at least $60 \%$ | Percentage of students reaching proficiency is at least 75\% | Percentage of students reaching proficiency is at least $\mathbf{9 0 \%}$ |

* 2006 was the first year that teachers in grades 3-5 administered the Benchmark Reading Assessment. This assessment is a diagnostic tool for reading instruction and is also used to determine independent reading levels based upon a high standard. Therefore, two different measures of reading on grade level are used: MCAS and Literacy Collaborative assessments.

## INTRODUCTION

## What are the CPS Benchmarks of Student Achievement?

The Cambridge Public Schools (CPS) Benchmarks were developed by principals and central office administrators from standards derived through state testing programs, TIMSS (Trends in International Mathematics and Science Study), standards in other states, and accepted research from experts in the field of education. The benchmark documents are a result of a review of this body of knowledge tempered by the experience of CPS administrators, teachers, and school councils. They serve as an accountability tool for schools and the district. In addition, the benchmarks help the community understand overall student achievement and progress in closing the achievement gap in our city's schools.

The CPS Benchmarks are comprehensive including primary and secondary indicators of achievement. Primary indicators are those set by the federal government's No Child Left Behind (NCLB) Act. Primary indicators include a standard of proficiency in English Language Arts (ELA) and Mathematics as measured by MCAS, the Massachusetts state testing program. Secondary indicators include additional academic assessments as well as measures of school climate, family participation / satisfaction, assessments of English Language Learners, Cambridge Rindge and Latin (CRLS) graduation indicators, and competencies for Rindge School of Technical Arts (RSTA).

Benchmarks are determined for individual schools and the district and are organized by grade levels K-5, 6-8 and 9-12. They are also determined for subgroups of students in order to measure the extent to which the school/ district has addressed the achievement gap. Students are categorized into subgroups as defined by the NCLB legislation.

Reports included in this document represent three years of benchmark data. Benchmark reports are used in assessing student outcomes in each school and overall progress of the school district. Individual school benchmarks are used by the school in annual school improvement planning and by the superintendent as one piece of the evaluation of principals. The district uses benchmarks to measure: progress in overall student achievement, the extent to which progress is made in closing the achievement gap among subgroups of students, the efficacy of existing programs, and the need for revisions in the District Improvement Plan.

## How Do I Read the Benchmark Document?

The broad categories are listed along the left hand side of the document. They include: testing, school climate, course enrollment, grades and graduation requirements. Specific indicators are listed within each category. MCAS proficiency in English Language Arts and Mathematics are considered primary indicators as measured by the No Child Left Behind (NCLB) federal requirements. All other indicators including MCAS passing rates are considered secondary indicators.

Indicators include:

## Academic Achievement Data

- MCAS (3-10) including alternate MCAS assessments for special education students
- Early Literacy Assessment in reading and writing (K-2)
- Literacy Collaborative Reading Assessment (3-5)
- Report card grades ( 6-12)
- Course failure rates (6-12)
- SAT
- PSAT
- AP (Advanced Placement course enrollment and exam pass rates)

## School Climate Information

- Discipline report
- Attendance
- Effective School Battery results ( teachers K-12, students 6-12)
- Parent participation in Student Conferences (K-8)
- Student participation in school sponsored extra curricula activities (9-12)
- Staff participation as advisors, sponsors, coaches in extra curricula activities (9-12)

## Assessments for English Language Learners

- MELA-O (English Proficiency testing for English Language Learners) K-2
- MEPA R/W ( Massachusetts English Proficiency Assessment in Reading and Writing for ELL students)

## RSTA Indicators

- RSTA field placement
- Career certification (RSTA)

## Graduation Indicators CRLS

- MCAS Competency Determination
- Graduation rate
- Dropout rate

## Establishing Benchmarks

Data from 2004-2005, 2005-2006 and 2006-2007 are listed next to each indicator and are used to determine growth from one year to the next. The next five (5) columns represent a continuum of progress in each area from Benchmark 1 being lowest to a Standard of Excellence. Data from 2006-07 is used to determine which benchmark is highlighted in yellow. When progress is not sufficient to reach Benchmark 1, the indicator box is highlighted.

Often a school will show improvement in values but will not move up a benchmark in a year. The goal is to see improvement from one year to the next.

## How will this document address the achievement gap in our schools?

Overall progress in each indicator is first reported for the aggregate (all students) within a school or in the district. Progress on each indicator is then reported for each subgroup of students. In determining the achievement gap for any indicator, the progress of students in a racial/ethnic subgroup is measured against the standard of proficiency.

Progress was reported for the MCAS \& CPS Literacy Assessments when there were 10 or more students in the subgroup. For all other indicators, the subgroups needed to have 20 or more students to have their results reported. The subgroups are those defined by NCLB legislation and are the same as those reported on schools’ Adequate Yearly Progress (AYP) reports. They include:

- African American/ Black
- Asian
- Hispanic
- White
- Multi-Race, Non-Hispanic
- Students receiving Free/ Reduced Lunch
- Special Education
- LEP (Limited English Proficient)

## How is this information connected to district and school improvement planning?

Benchmark data is used by the district and schools as a part of on-going improvement planning. Each school is responsible for summarizing overall achievement, showing progress in closing the achievement gap, and identifying specific areas of concern and focus. This information becomes part of the district/school's improvement plan. Each year the data is updated, progress is reviewed and School Improvement Plans are updated as part of a continuous improvement cycle.

The following pages include a summary of highlights from the district Benchmark Reports. As in the case of the schools, the district will incorporate this information into its revised District Improvement Plan for the upcoming school year.

## Elementary Benchmarks Grades K-5

# Middle School Benchmarks Grades 6-8 

## Benchmarks Glossary

## Benchmarks Glossary November 2007

| AP | Advanced Placement courses are offered at the high school. There are also AP tests to determine student proficiency in those courses. Participation in AP courses is highly desirable for entrance into college. |
| :---: | :---: |
| Benchmarks | Fixed points along a continuum of growth towards proficiency in a particular area. |
| COP | Certificate of Occupational Proficiency - Awarded to RSTA seniors only |
| DETAIL | A detailed discipline report of CRLS student infractions presented to the School Committee monthly. |
| Effective School Battery | A survey measuring school climate administered to teachers K-12 and students 6-12. |
| ELL | English Language Learner |
| GAP Indicators | The performance among NCLB subgroups as compared to the standard. |
| GPA | Grade Point Average. A point system that reflects the average of students' grades. |
| LEP | Limited English Proficient |
| MCAS C.D. | MCAS Competency Determination - status achieved by CRLS students once they have passed both the MCAS English and MCAS Math tests. It is necessary for graduation. |
| MCAS - ELA | Massachusetts Comprehensive Assessment System English Language Arts |
| MELA-O | Massachusetts English Language Assessment-Oral; required by the state of ELL students K-12 |
| MEPA - R/W | Massachusetts English Proficiency Assessment - Reading and Writing. Measures ELL students' English Language Proficiency against Massachusetts State Standards. |
| PSAT | Pre-Scholastic Achievement Test - serves as an opportunity for students to have an experience like the SAT. Determines eligibility for National Merit Award. |
| Primary Indicators | The first, most critical measure of school progress, i.e. proficiency of all students on the MCAS |
| SAT | Scholastic Achievement Test - required of most colleges as a condition of acceptance. |
| Secondary Indicators | Other measures of school progress that may contribute to, or indicate progress towards, proficiency on the MCAS. |

## INTRODUCTION

## What are the CPS Benchmarks of Student Achievement?

The Cambridge Public Schools (CPS) Benchmarks were developed by principals and central office administrators from standards derived through state testing programs, TIMSS (Trends in International Mathematics and Science Study), standards in other states, and accepted research from experts in the field of education. The benchmark documents are a result of a review of this body of knowledge tempered by the experience of CPS administrators, teachers, and school councils. They serve as an accountability tool for schools and the district. In addition, the benchmarks help the community understand overall student achievement and progress in closing the achievement gap in our city's schools.

The CPS Benchmarks are comprehensive including primary and secondary indicators of achievement. Primary indicators are those set by the federal government's No Child Left Behind (NCLB) Act. Primary indicators include a standard of proficiency in English Language Arts (ELA) and Mathematics as measured by MCAS, the Massachusetts state testing program. Secondary indicators include additional academic assessments as well as measures of school climate, family participation / satisfaction, assessments of English Language Learners, Cambridge Rindge and Latin (CRLS) graduation indicators, and competencies for Rindge School of Technical Arts (RSTA).

Benchmarks are determined for individual schools and the district and are organized by grade levels K-5, 6-8 and 9-12. They are also determined for subgroups of students in order to measure the extent to which the school/ district has addressed the achievement gap. Students are categorized into subgroups as defined by the NCLB legislation.

Reports included in this document represent three years of benchmark data. Benchmark reports are used in assessing student outcomes in each school and overall progress of the school district. Individual school benchmarks are used by the school in annual school improvement planning and by the superintendent as one piece of the evaluation of principals. The district uses benchmarks to measure: progress in overall student achievement, the extent to which progress is made in closing the achievement gap among subgroups of students, the efficacy of existing programs, and the need for revisions in the District Improvement Plan.

## How Do I Read the Benchmark Document?

The broad categories are listed along the left hand side of the document. They include: testing, school climate, course enrollment, grades and graduation requirements. Specific indicators are listed within each category. MCAS proficiency in English Language Arts and Mathematics are considered primary indicators as measured by the No Child Left Behind (NCLB) federal requirements. All other indicators including MCAS passing rates are considered secondary indicators.

Indicators include:

## Academic Achievement Data

- MCAS (3-10) including alternate MCAS assessments for special education students
- Early Literacy Assessment in reading and writing (K-2)
- Literacy Collaborative Reading Assessment (3-5)
- Report card grades ( 6-12)
- Course failure rates (6-12)
- SAT
- PSAT
- AP (Advanced Placement course enrollment and exam pass rates)

## School Climate Information

- Discipline report
- Attendance
- Effective School Battery results ( teachers K-12, students 6-12)
- Parent participation in Student Conferences (K-8)
- Student participation in school sponsored extra curricula activities (9-12)
- Staff participation as advisors, sponsors, coaches in extra curricula activities (9-12)

## Assessments for English Language Learners

- MELA-O (English Proficiency testing for English Language Learners) K-2
- MEPA R/W ( Massachusetts English Proficiency Assessment in Reading and Writing for ELL students)

## RSTA Indicators

- RSTA field placement
- Career certification (RSTA)

## Graduation Indicators CRLS

- MCAS Competency Determination
- Graduation rate
- Dropout rate

## Establishing Benchmarks

Data from 2004-2005, 2005-2006 and 2006-2007 are listed next to each indicator and are used to determine growth from one year to the next. The next five (5) columns represent a continuum of progress in each area from Benchmark 1 being lowest to a Standard of Excellence. Data from 2006-07 is used to determine which benchmark is highlighted in yellow. When progress is not sufficient to reach Benchmark 1, the indicator box is highlighted.

Often a school will show improvement in values but will not move up a benchmark in a year. The goal is to see improvement from one year to the next.

## How will this document address the achievement gap in our schools?

Overall progress in each indicator is first reported for the aggregate (all students) within a school or in the district. Progress on each indicator is then reported for each subgroup of students. In determining the achievement gap for any indicator, the progress of students in a racial/ethnic subgroup is measured against the standard of proficiency.

Progress was reported for the MCAS \& CPS Literacy Assessments when there were 10 or more students in the subgroup. For all other indicators, the subgroups needed to have 20 or more students to have their results reported. The subgroups are those defined by NCLB legislation and are the same as those reported on schools' Adequate Yearly Progress (AYP) reports. They include:

- African American/ Black
- Asian
- Hispanic
- White
- Multi-Race, Non-Hispanic
- Students receiving Free/ Reduced Lunch
- Special Education
- LEP (Limited English Proficient)

## How is this information connected to district and school improvement planning?

Benchmark data is used by the district and schools as a part of on-going improvement planning. Each school is responsible for summarizing overall achievement, showing progress in closing the achievement gap, and identifying specific areas of concern and focus. This information becomes part of the district/school's improvement plan. Each year the data is updated, progress is reviewed and School Improvement Plans are updated as part of a continuous improvement cycle.

The following pages include a summary of highlights from the district Benchmark Reports. As in the case of the schools, the district will incorporate this information into its revised District Improvement Plan for the upcoming school year.

## Elementary Benchmarks Grades K-5

# Middle School Benchmarks Grades 6-8 

## Benchmarks Glossary

## Benchmarks Glossary November 2007

| AP | Advanced Placement courses are offered at the high school. There are also AP tests to determine student proficiency in those courses. Participation in AP courses is highly desirable for entrance into college. |
| :---: | :---: |
| Benchmarks | Fixed points along a continuum of growth towards proficiency in a particular area. |
| COP | Certificate of Occupational Proficiency - Awarded to RSTA seniors only |
| DETAIL | A detailed discipline report of CRLS student infractions presented to the School Committee monthly. |
| Effective School Battery | A survey measuring school climate administered to teachers K-12 and students 6-12. |
| ELL | English Language Learner |
| GAP Indicators | The performance among NCLB subgroups as compared to the standard. |
| GPA | Grade Point Average. A point system that reflects the average of students' grades. |
| LEP | Limited English Proficient |
| MCAS C.D. | MCAS Competency Determination - status achieved by CRLS students once they have passed both the MCAS English and MCAS Math tests. It is necessary for graduation. |
| MCAS - ELA | Massachusetts Comprehensive Assessment System English Language Arts |
| MELA-O | Massachusetts English Language Assessment-Oral; required by the state of ELL students K-12 |
| MEPA - R/W | Massachusetts English Proficiency Assessment - Reading and Writing. Measures ELL students' English Language Proficiency against Massachusetts State Standards. |
| PSAT | Pre-Scholastic Achievement Test - serves as an opportunity for students to have an experience like the SAT. Determines eligibility for National Merit Award. |
| Primary Indicators | The first, most critical measure of school progress, i.e. proficiency of all students on the MCAS |
| SAT | Scholastic Achievement Test - required of most colleges as a condition of acceptance. |
| Secondary Indicators | Other measures of school progress that may contribute to, or indicate progress towards, proficiency on the MCAS. |

| مٍ | Literacy Collaborative Reading Assessment* (grades 3-5) | $\begin{gathered} \text { given } \\ \text { in } \\ 2005- \\ 2006 \end{gathered}$ | 66\% | 68\% | Percentage of students reaching proficiency is at least $\mathbf{4 0 \%}$ | Percentage of students reaching proficiency is at least $\mathbf{5 0 \%}$ | Percentage of students reaching proficiency is at least 60\% | Percentage of students reaching proficiency is at least 75\% | Percentage of students reaching proficiency is at least $\mathbf{9 0 \%}$ |

* 2006 was the first year that teachers in grades 3-5 administered the Benchmark Reading Assessment. This assessment is a diagnostic tool for reading instruction and is also used to determine independent reading levels based upon a high standard. Therefore, two different measures of reading on grade level are used: MCAS and Literacy Collaborative assessments.

## INTRODUCTION

## What are the CPS Benchmarks of Student Achievement?

The Cambridge Public Schools (CPS) Benchmarks were developed by principals and central office administrators from standards derived through state testing programs, TIMSS (Trends in International Mathematics and Science Study), standards in other states, and accepted research from experts in the field of education. The benchmark documents are a result of a review of this body of knowledge tempered by the experience of CPS administrators, teachers, and school councils. They serve as an accountability tool for schools and the district. In addition, the benchmarks help the community understand overall student achievement and progress in closing the achievement gap in our city's schools.

The CPS Benchmarks are comprehensive including primary and secondary indicators of achievement. Primary indicators are those set by the federal government's No Child Left Behind (NCLB) Act. Primary indicators include a standard of proficiency in English Language Arts (ELA) and Mathematics as measured by MCAS, the Massachusetts state testing program. Secondary indicators include additional academic assessments as well as measures of school climate, family participation / satisfaction, assessments of English Language Learners, Cambridge Rindge and Latin (CRLS) graduation indicators, and competencies for Rindge School of Technical Arts (RSTA).

Benchmarks are determined for individual schools and the district and are organized by grade levels K-5, 6-8 and 9-12. They are also determined for subgroups of students in order to measure the extent to which the school/ district has addressed the achievement gap. Students are categorized into subgroups as defined by the NCLB legislation.

Reports included in this document represent three years of benchmark data. Benchmark reports are used in assessing student outcomes in each school and overall progress of the school district. Individual school benchmarks are used by the school in annual school improvement planning and by the superintendent as one piece of the evaluation of principals. The district uses benchmarks to measure: progress in overall student achievement, the extent to which progress is made in closing the achievement gap among subgroups of students, the efficacy of existing programs, and the need for revisions in the District Improvement Plan.

## How Do I Read the Benchmark Document?

The broad categories are listed along the left hand side of the document. They include: testing, school climate, course enrollment, grades and graduation requirements. Specific indicators are listed within each category. MCAS proficiency in English Language Arts and Mathematics are considered primary indicators as measured by the No Child Left Behind (NCLB) federal requirements. All other indicators including MCAS passing rates are considered secondary indicators.

Indicators include:

## Academic Achievement Data

- MCAS (3-10) including alternate MCAS assessments for special education students
- Early Literacy Assessment in reading and writing (K-2)
- Literacy Collaborative Reading Assessment (3-5)
- Report card grades ( 6-12)
- Course failure rates (6-12)
- SAT
- PSAT
- AP (Advanced Placement course enrollment and exam pass rates)

## School Climate Information

- Discipline report
- Attendance
- Effective School Battery results ( teachers K-12, students 6-12)
- Parent participation in Student Conferences (K-8)
- Student participation in school sponsored extra curricula activities (9-12)
- Staff participation as advisors, sponsors, coaches in extra curricula activities (9-12)

## Assessments for English Language Learners

- MELA-O (English Proficiency testing for English Language Learners) K-2
- MEPA R/W ( Massachusetts English Proficiency Assessment in Reading and Writing for ELL students)

## RSTA Indicators

- RSTA field placement
- Career certification (RSTA)

## Graduation Indicators CRLS

- MCAS Competency Determination
- Graduation rate
- Dropout rate

## Establishing Benchmarks

Data from 2004-2005, 2005-2006 and 2006-2007 are listed next to each indicator and are used to determine growth from one year to the next. The next five (5) columns represent a continuum of progress in each area from Benchmark 1 being lowest to a Standard of Excellence. Data from 2006-07 is used to determine which benchmark is highlighted in yellow. When progress is not sufficient to reach Benchmark 1, the indicator box is highlighted.

Often a school will show improvement in values but will not move up a benchmark in a year. The goal is to see improvement from one year to the next.

## How will this document address the achievement gap in our schools?

Overall progress in each indicator is first reported for the aggregate (all students) within a school or in the district. Progress on each indicator is then reported for each subgroup of students. In determining the achievement gap for any indicator, the progress of students in a racial/ethnic subgroup is measured against the standard of proficiency.

Progress was reported for the MCAS \& CPS Literacy Assessments when there were 10 or more students in the subgroup. For all other indicators, the subgroups needed to have 20 or more students to have their results reported. The subgroups are those defined by NCLB legislation and are the same as those reported on schools’ Adequate Yearly Progress (AYP) reports. They include:

- African American/ Black
- Asian
- Hispanic
- White
- Multi-Race, Non-Hispanic
- Students receiving Free/ Reduced Lunch
- Special Education
- LEP (Limited English Proficient)

## How is this information connected to district and school improvement planning?

Benchmark data is used by the district and schools as a part of on-going improvement planning. Each school is responsible for summarizing overall achievement, showing progress in closing the achievement gap, and identifying specific areas of concern and focus. This information becomes part of the district/school's improvement plan. Each year the data is updated, progress is reviewed and School Improvement Plans are updated as part of a continuous improvement cycle.

The following pages include a summary of highlights from the district Benchmark Reports. As in the case of the schools, the district will incorporate this information into its revised District Improvement Plan for the upcoming school year.

## Elementary Benchmarks Grades K-5

# Middle School Benchmarks Grades 6-8 

## Benchmarks Glossary

## Benchmarks Glossary November 2007

| AP | Advanced Placement courses are offered at the high school. There are also AP tests to determine student proficiency in those courses. Participation in AP courses is highly desirable for entrance into college. |
| :---: | :---: |
| Benchmarks | Fixed points along a continuum of growth towards proficiency in a particular area. |
| COP | Certificate of Occupational Proficiency - Awarded to RSTA seniors only |
| DETAIL | A detailed discipline report of CRLS student infractions presented to the School Committee monthly. |
| Effective School Battery | A survey measuring school climate administered to teachers K-12 and students 6-12. |
| ELL | English Language Learner |
| GAP Indicators | The performance among NCLB subgroups as compared to the standard. |
| GPA | Grade Point Average. A point system that reflects the average of students' grades. |
| LEP | Limited English Proficient |
| MCAS C.D. | MCAS Competency Determination - status achieved by CRLS students once they have passed both the MCAS English and MCAS Math tests. It is necessary for graduation. |
| MCAS - ELA | Massachusetts Comprehensive Assessment System English Language Arts |
| MELA-O | Massachusetts English Language Assessment-Oral; required by the state of ELL students K-12 |
| MEPA - R/W | Massachusetts English Proficiency Assessment - Reading and Writing. Measures ELL students' English Language Proficiency against Massachusetts State Standards. |
| PSAT | Pre-Scholastic Achievement Test - serves as an opportunity for students to have an experience like the SAT. Determines eligibility for National Merit Award. |
| Primary Indicators | The first, most critical measure of school progress, i.e. proficiency of all students on the MCAS |
| SAT | Scholastic Achievement Test - required of most colleges as a condition of acceptance. |
| Secondary Indicators | Other measures of school progress that may contribute to, or indicate progress towards, proficiency on the MCAS. |

* 2006 was the first year that teachers in grades 3-5 administered the Benchmark Reading Assessment. This assessment is a diagnostic tool for reading instruction and is also used to determine independent reading levels based upon a high standard. Therefore, two different measures of reading on grade level are used: MCAS and Literacy Collaborative assessments.

[^20]:    * 2006 was the first year that teachers in grades 3-5 administered the Benchmark Reading Assessment. This assessment is a diagnostic tool for reading instruction and is also used to determine independent reading levels based upon a high standard. Therefore, two different measures of reading on grade level are used: MCAS and Literacy Collaborative assessments.
