

# Neurodiversity Internship Program

This January, the **McGovern Institute for Brain Research** will be running an **neurodiversity internship program**, in partnership with Neurodiversity in the Workplace. Selected candidates will participate in a **three-day virtual hiring event** aimed at showcasing their professional and technical skills. At the completion of the program, some candidates will be offered **paid internship positions at MIT** and will be offered ongoing career support.

**We are seeking neurodivergent candidates with the following skills:**

- **Strong research abilities**, including:
  - Study design and implementation
  - Ability to find and synthesize literature
  - Data visualization and analysis
- Advanced knowledge of **Excel**
- Experience with one or more of the following: **Python, Matlab, R, CSS, HTML, JavaScript**
- Knowledge of **machine learning**

## Interested?
